

FIREPOINT® 2-IN-1 LED HEADLAMP/ WORK LIGHT

SAVE THIS OWNER'S MANUAL FOR FUTURE REFERENCE

Battery:	3.7V 18650 2600 mAh Li-Ion
Charging Time:	3 - 4 hours
Lumens:	250 (low), 1500 (high), 2000+ (Boost)
Run Time:	7 hr. (low), 2.5 hr. (high), 60 sec. (per Boost)

Read owner's guide before operating lights. Failure to follow instructions listed in this guide may result in electric shock, fire and/or serious injury.

FEATURES:

- Super bright Cree LED produces 2000+ lumens on Boost mode
- Features 3 output modes: Boost, High, and Low
- Flexible bracket allows light to be removed for use without the strap
- Magnetic base and optional pocket clip for additional hands-free operation
- Adjustable head band for comfort with variable angle for precise illumination
- Belt clip included
- Comfortable and lightweight low profile design is great for confined areas
- Includes 18650 rechargeable lithium ion battery & micro USB charging cable
- Charge time, 3 to 4 hrs.

OPERATING INSTRUCTIONS:

1. From the off position, click power button once for Low mode, 250 lumens.
2. From the off position, click power button twice for High mode, 1500 lumens.
3. From the off position, click power button three times for Boost mode*, 2000+ lumens.
***NOTE:** This is an "overdrive" light setting that lasts up to 60 seconds. After 60 seconds the light automatically drops back down to 250 lumens. To get back to Boost mode, click the power button again twice, to get 2000+ lumens for another 60 seconds. Output varies with battery level.
4. Press and hold the power button for 2 full seconds to turn the light off.

CHARGING:

1. Plug the micro USB charging cable into the port on the back of the head of the light.
2. Plug USB cable into standard USB port. A red light indicates charging.
3. Charge until the light turns green. A full charge should take no more than 3 to 4 hours.
4. Remove charging cable from the light and unplug charging cable from the USB port.

REPLACING BATTERY:

1. Carefully unscrew tail cap and remove the drained or old battery.
2. Recycle/dispose of old battery properly. Information can be found online at www.batteryrecycling.com
3. Replace the old battery with the identical (18650) 2600 mAh Lithium-Ion battery that was inside the unit, PT Power® W2655B. Do not use any other type of battery.
 - a. Never use different style batteries. Use Li-Ion batteries only.
 - b. Make sure and install battery with the correct polarity (+/-).
 - c. After putting new battery inside battery housing, screw tail cap back on.

Please read the warnings below for information on how to recycle & dispose of unit.

⚠
<ul style="list-style-type: none"> • Keep away from children and pets. • Do not look directly into the LED light or shine the LED light into anyone's face. • Do not mix old and new batteries. Do not mix alkaline, standard (carbon-zinc), or rechargeable (nickel-cadmium) batteries. • Do not install batteries backwards or put in fire; batteries could leak or explode, causing injury. • Do not submerge in liquid. • For best results, recharge batteries once fully discharged. • Recharge batteries if unused for more than 3 months; remove from the product if it will be stored for longer periods.

Lithium-ion rechargeable batteries are designed to hold charge up to 500 cycles. Life cycle may vary depending on proper care and maintenance. Proper disposal and recycling of Lithium-ion rechargeable batteries are required. Failure to do so may result in federal or state fines. Please recycle after battery life is depleted.
