

Safety

See safety datasheet (if applicable) and product label for safety information, handling and proper use.

Directions for Use

For use with the Hillyard Arsenal One dispensing systems. Remove shipping cap and insert this container into the dispensing system. Secure the dispensing system cap to refill container. Dispense product by selecting the product on the dispenser control panel and press the button to dispense product into bottle. For bucket fill, attach bucket fill hose BEFORE dispensing product. Place Wet Floor signs in area to be cleaned. Apply generous amounts of Neutralizer after stripping floors. Wet vacuum floor thoroughly after applying stripper. NOTE: Can also be used to rinse carpets using an extractor, especially to rinse ice melt.

Neutralizer is a high quality neutralizer and conditioner formulated to help eliminate alkaline residues on floors. On resilient and hard floors, its special chelating action ties up the insoluble alkaline salts left behind by alkaline strippers that can case floor finishes to powder or wear poorly. Neutralizer allows stripper residue to be quickly and easily removed. Its labor-saving formula eliminates multiple rinsing steps.
