## **AWARNING**

To reduce the risk of serious injury or death, please read and follow these instructions. Keep and refer to instructions as needed and pass along to any future owners of this item.

## Congratulations on purchasing a KidKraft product!

Our items are made of high-quality, durable Cunninghamia Lanceolata wood from the cypress family.

Lumber from these trees are known for their light weight and excellent strength. The porosity of this wood allows the moisture to absorb and evaporate in the fibers, resisting rot and bugs.

Engineered for great play, our products also go through extensive testing for safety.

Plus, our team has developed a series of proprietary methods for a simpler, more organized assembly. Less build time and more play time is our motto!

However, during assembly if you have any questions or concerns, please reach out. Our Customer Service can help with missing parts, instructions or maintenance.

## **Warnings and Safe Play Instructions**

**CONTINUOUS ADULT SUPERVISION REQUIRED.** Most serious injuries and deaths on playground equipment have occurred while children were unsupervised! Our products are designed to meet mandatory and voluntary safety standards. Complying with all warnings and recommendations in these instructions will reduce the risk of serious or fatal injury to children using this play system. Go over the warnings and safe play instructions regularly with your children and make certain that they understand and follow them. Remember on-site adult supervision is required for children of all ages.

## **WARNING**

#### **SERIOUS HEAD INJURY HAZARD**

Installation over concrete, asphalt, dirt, grass, carpet and other hard surface creates a risk of serious injury or death from falls to the ground. Install and maintain shock absorbing material under and around play-set as recommended on page 3 of these instructions.

#### **COLLISION HAZARD**

Place play-set on level ground at least 2m from any obstruction such as a garage or house, fences, poles, trees, sidewalks, walls, landscape timbers, rocks, pavement, planters, garden borders, overhanging branches, laundry lines, and electrical wires. (See OBSTACLE FREE SAFETY ZONE on cover)

#### **CHOKING HAZARD/SHARP EDGES & POINTS**

Adult assembly required. This product contains small parts and parts with sharp edges and points. Keep parts away from children until fully assembled.

#### WARNING LABEL

Owners shall be responsible for maintaining the legibility of the warning labels.

#### STRANGULATION HAZARD

- NEVER allow children to play with ropes, clotheslines, pet leashes, cables, chains or cord-like items when using this play-set or to attach these items to play-set.
- NEVER allow children to wear loose fitting clothing, ponchos, hoods, scarves, capes, necklaces, items with draw-strings, cords or ties when using this play-set.
- NEVER allow children to wear bike or sport helmets when using this play-set.

Failure to prohibit these items, even helmets with chin straps, increases the risk of serious injury and death to children from entanglement and strangulation.

#### **TIP OVER HAZARD**

Choose a level location for the equipment. This can reduce the likelihood of the play set tipping over and loose-fill surfacing materials washing away during heavy rains.

DO NOT allow children to play on the play-set until the assembly is complete and the unit is properly anchored.

Never add extra length to chain or rope. The chains or ropes provided are the maximum length designed for the swinging element(s).

## A

## **WARNING** – Safe Play Instructions

- Observe capacity limitations of your play-set. See front cover.
- Dress children with well fitting and full foot enclosing footwear.
- Teach children to sit with their full weight in the center of the swing seat to prevent erratic swing motion or falling off.
- Check for splintered, broken or cracked wood; missing, loose, or sharp edged hardware. Replace, tighten and or sand smooth as required prior to playing.
- Verify that suspended climbing ropes, rope ladders, chain or cable are secured at both ends and cannot be looped back on itself as to create an entanglement hazard.
- On sunny and or hot days, check the slide and other plastic rides to assure that they are not very hot as to cause burns. Cool hot slide and rides with water and wipe dry prior to using.
- ✓ Orientate slide such that it gets the least amount of exposure to the sun.

- Do not allow children to wear open toe or heel footwear like sandals, flip-flops or clogs.
- Do not allow children to walk, in front, between, behind or close to moving rides.
- Do not let children twist swing chains or ropes or loop them over the top support bar. This may reduce the strength of the chain or rope and cause premature failure.
- > Do not let children get off rides while they are in motion.
- > Do not permit climbing on equipment when it is wet.
- ➤ Do not permit rough play or use of equipment in a manner for which it was not intended. Standing on or jumping from the roof, elevated platforms, swings, climbers, ladders or slide can be dangerous.
- Do not allow children to swing empty rides or seats.
- Do not allow children to go down slide head first or run up slide.

## A Protective Surfacing - Reducing Risk of Serious Head Injury From Falls

One of the most important things you can do to reduce the likelihood of serious head injuries is to install shock-absorbing protective surfacing under and around your play equipment. The protective surfacing should be applied to a depth that is suitable for the equipment height in accordance with ASTM F1292. There are different types of surfacing to choose from; whichever product you select, follow these guidelines:

#### Loose-Fill Materials

- Maintain a minimum depth of 9 inches (23 cm) of loose-fill materials such as wood mulch/chips, engineered wood fiber (EWF), or shredded/recycled rubber mulch for equipment up to 8 feet (2.45 m) high; and 9 inches (23 cm) of sand or pea gravel for equipment up to 5 feet (1.5 m) high. NOTE: An initial fill level of 12 inches (31 cm) will compress to about a 9-inch (23 cm) depth of surfacing over time. The surfacing will also compact, displace, and settle, and should be periodically raked and refilled to maintain at least a 9-inch (23 cm) depth.
- Use a minimum of 6 inches (16 cm) of protective surfacing for play equipment less than 4 feet (1.22 m) in height. If maintained properly, this should be adequate. (At depths less than 6 inches (16 cm), the protective material is too easily displaced or compacted.)

NOTE: Do not install home playground equipment over concrete, asphalt, or any other hard surface. A fall onto a hard surface can result in serious injury to the equipment user. Grass and dirt are not considered protective surfacing because wear and environmental factors can reduce their shock absorbing effectiveness. Carpeting and thin mats are not adequate protective surfacing. Ground level equipment -- such as a sandbox, activity wall, playhouse or other equipment that has no elevated play surface -- does not need any protective surfacing.

- Use containment, such as digging out around the perimeter and/or lining the perimeter with landscape edging. Don't forget to account for water drainage.
- Periodically rake, check and maintain the depth of the loose-fill surfacing material. Marking the correct depth on the play equipment support posts will help you to see when the material has settled and needs to be raked and or replenished. Be sure to rake and evenly redistribute the surfacing in heavily used areas.
- Do not install loose fill surfacing over hard surfaces such as concrete or asphalt.

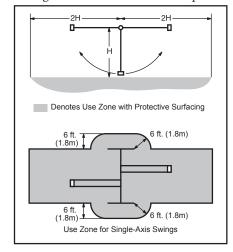

### Poured-In-Place Surfaces or Pre-Manufactured Rubber Tiles

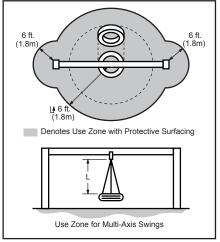

You may be interested in using surfacing other than loose-fill materials - like rubber tiles or poured-in-place surfaces.

- Installations of these surfaces generally require a professional and are not "do-it yourself" projects.
- Review surface specifications before purchasing this type of surfacing. Ask the installer/manufacturer for a report showing that the product has been tested to the following safety standard: ASTM F1292 Standard Specification for Impact Attenuation of Surfacing Materials within the Use Zone of Playground Equipment. This report should show the specific height for which the surface is intended to protect against serious head injury. This height should be equal to or greater than the fall height - vertical distance between a designated play surface (elevated surface for standing, sitting, or climbing) and the protective surfacing below - of your play equipment.
- Check the protective surfacing frequently for wear.

Proper placement and maintenance of protective surfacing is essential. Refer to diagram on front cover. Be sure to;

- Extend surfacing at least 6 feet (1.8 m) from the equipment in all directions.
- For to-fro swings, extend protective surfacing in front of and behind the swing to a distance equal to twice the height of the top bar from which the swing is suspended.
- For tire swings, extend surfacing in a circle whose radius is equal to the height of the suspending chain or rope, plus 6 feet (1.8 m) in all directions.

## **Instructions for Proper Maintenance**

Your KidKraft Play System is designed and constructed of quality materials with your child's safety in mind. As with all outdoor products used by children, it will weather and wear. To maximize the enjoyment, safety and life of your Play Set, it is important that you, the owner, properly maintain it.

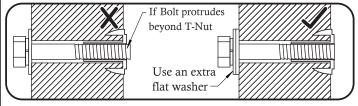

## Check the following at the beginning of the play season:

#### HARDWARE:

- ✓ Check metal parts for rust. If found, sand and repaint using a non-lead paint complying with 16 CFR 1303.
- ✓ Inspect and tighten all hardware. On wood assemblies DO NOT OVER-TIGHTEN as to cause crushing and splintering of wood.

✓ Check for sharp edges or protruding screw threads, add washers if required.

### SHOCK ABSORBING SURFACING:

✓ Check for foreign objects. Rake and check depth of loose fill protective surfacing materials to prevent compaction and maintain appropriate depth. Replace as necessary. (See Protective Surfacing, page 3)

#### GROUND STAKES (ANCHORS):

✓ Check for looseness, damage or deterioration. Should firmly anchor unit to ground during use. Re-secure and or replace, if necessary.

#### **SWING HANGERS:**

- ✓ Check that bolts are secure and tight. Quick clips should be completely closed and threaded clips screwed tight.
- ✓ If squeaking occurs lubricate bushings with oil or WD-40®. SWINGS, ROPES AND RIDES:
- ✓ Reinstall if removed during cold season. Check all moving parts including swing seats, ropes, chains and attachments for wear, rust and other deterioration. Replace as needed.
- ✓ Check that ropes are tight, secure at both ends and cannot loop back as to create an entrapment.

### WOOD PARTS:

- ✓ Check all wood members for deterioration, structural damage and splintering. Sand down splinters and replace deteriorated wood members. As with all wood, some checking and small cracks in grain is normal.
- ✓ Applying a water repellent or stain (water-based) on a yearly basis is important maintenance to maintain maximum life and performance of the product.

## Check twice a month during play season:

## HARDWARE:

- ✓ Inspect for tightness. Must be firmly against, but not crushing the wood. DO NOT OVER-TIGHTEN. This will cause splintering of wood.
- ✓ Check for sharp edges or protruding screw threads. Add washers if required.

### SHOCK ABSORBING SURFACING:

✓ Rake and check depth of loose fill protective surfacing materials to prevent compaction and maintain appropriate depth. Replace as necessary. (See Protective Surfacing, page 3)

## Check once a month during play season:

#### SWING HANGERS:

- ✓ Check that they are secure and orientated correctly. Hook should rotate freely and perpendicular to support beam.
- If squeaking occurs lubricate bushings with oil or WD-40®.

#### SWINGS AND RIDES:

✓ Check swing seats, all ropes, chains and attachments for fraying, wear, excessive corrosion or damage. Replace if structurally damaged or deteriorated.

## Check at the end of the play season:

### **SWINGS AND RIDES:**

✓ To prolong their life, remove swings and store inside when outside temperature is below 32°F/0°C. Below freezing, plastic parts may become more brittle.

### SHOCK ABSORBING SURFACING:

✓ Rake and check depth of loose fill protective surfacing materials to prevent compaction and maintain appropriate depth. Replace as necessary. (See Protective Surfacing, page 3)

If you dispose of your play set: Please disassemble and dispose of your unit so that it does not create any unreasonable hazards at the time it is discarded. Be sure to follow your local waste ordinances.

## **About Our Wood**

KidKraft Premium Play Systems uses only premium playset lumber, ensuring the safest product for your children's use. Although we take great care in selecting the best quality lumber available, wood is still a product of nature and susceptible to weathering which can change the appearance of your set.

## What causes weathering? Does it affect the strength of my Play System?

One of the main reasons for weathering is the effects of water (moisture); the moisture content of the wood at the surface is different than the interior of the wood. As the climate changes, moisture moves in or out of the wood, causing tension which can result in checking and or warping. You can expect the following due to weathering. These changes will not affect the strength of the product:

1. **Checking** is surface cracks in the wood along the grain. A post  $4" \times 4"$  (101mm x 101mm) will experience more checking than a board  $1" \times 4"$  (25mm x 101mm) because the surface and interior moisture content will vary more widely than in

thinner wood.

- 2. **Warping** results from any distortion (twisting, cupping) from the original plane of the board and often happens from rapid wetting and drying of the wood.
- 3. **Fading** happens as a natural change in the wood color as it is exposed to sun-light and will turn a grey over time.

## How can I reduce the amount of weathering to my Play System?

At the factory we have coated the wood with a water repellent or stain. This coating decreases the amount of water absorption during rain or snow thus decreasing the tension in the wood. Sunlight will break down the coating, so we recommend applying a water repellent or stain on a yearly basis (see your local stain and paint supplier for a recommended product).

Most weathering is just the normal result of nature and will not affect safe play and enjoyment for your child. However if you are concerned that a part has experienced a severe weathering problem please call our consumer relations department for further assistance.

## **KidKraft Limited Warranty**

#### **MISSING OR DAMAGED PARTS:**

KidKraft will replace any parts within 90 days from date of purchase found to be missing from or damaged in the original packaging. See Fig.1

Fig. 1 Product Age (All Parts) Consumer Pays

0-90 Days from date of purchase \$0 for Part + Free Shipping

### **DEFECTS IN MATERIAL AND WORKMANSHIP:**

KidKraft warrants that this product is free from defects in materials and workmanship for a period of one (1) year from the original date of purchase (dated sales receipt and/or product registration is required). This one (1) year warranty covers all parts including wood, hardware, and all accessories (Such as swings, rides, and slides). See Fig. 2

Fig. 2 Product Age (All Parts) Consumer Pays

91 Days to 1 Year \$0 for Part + Free Shipping

### WOOD ROT, DECAY, AND INSECT DAMAGE:

All wood carries a five (5) year warranty against rot, decay, and insect damage (dated sales receipt and/or product registration is required). Refer to the schedule below for charges associated with replacement of wood parts under this **Limited Warranty.** See Fig. 3

Fig. 3 Product Age (Wood Parts) Consumer Pays

0 Days to 1 Year \$0 for Part + Free Shipping

After 1 Year to 5 Year \$0 for Part + Shipping & Handling

Over 5 Years 100% for Part (if available) + Shipping & Handling

This warranty applies to the original owner and registrant and is non-transferable. Regular maintenance is required to ensure the integrity of this product. Failure by the owner to maintain the product according to the maintenance requirements may void this warranty.

This Limited Warranty does NOT cover:

- Any inspection cost
- Labor and/or costs for replacement of any defective item(s), including but not limited to, professional installer costs
- Incidental or consequential damages, including but not limited to, as a result of set relocation, move and/or reinstall
- Cosmetic defects which do not affect performance or integrity of a part or the entire product
- Vandalism, improper use or installation, or acts of nature, including but not limited to, high winds, fire, and flood
- Minor twisting, warping, checking, or any natural occurring properties of wood that do not affect performance or integrity.
- Any KidKraft product purchased, including but not limited to, a non-approved retailer, auction houses, second-hand, and as-is clearance items.

KidKraft products have been designed for safety and quality. Modifications made to the original product may damage the structural integrity of the unit leading to failure and possible injury. KidKraft cannot assume any responsibility for the modified products. Furthermore, modifications void all warranties.

This product is warranted for **RESIDENTIAL USE ONLY**. Under no circumstance should a KidKraft product be used in public settings such as schools, churches, playgrounds, parks, home and professional day cares and the like. Such use may lead to product failure and potential injury. Public use will void this warranty. KidKraft disclaims all other representations and warranties of any kind, express or implied.

help!

Use a measuring tape to assure proper location.

This indicates time to tighten bolts, but not too tight! Do not crush the wood. This may create splinters and cause structural damage.

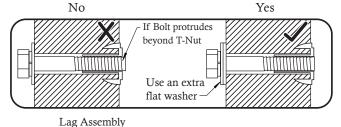

## CAUTION – Protrusion Hazard

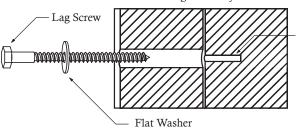

Once the assembly is tightened, watch for exposed threads. If a thread protrudes from the T-Nut, remove the bolt and add washers to eliminate this condition. Extra washers have been provided for this purpose.

Proper Hardware Assembly Lag screws require drilling pilot holes to avoid splitting wood. Only a flat washer is required. For ease of installation liquid soap can be used on all lag-type screws.

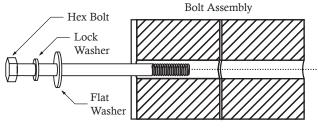

For bolts, tap T-Nut into hole with hammer. Insert the hex bolt through lock washer first then flat washer then hole. Because the assemblies need to be squared do not completely tighten until instructed. Pay close attention to diameter of the bolts. 5/16" (8mm) is slightly larger than 1/4" (6.4mm).

Note: Wafer head bolts with blue lock tight or a bolt with a Ny-Lok nut do NOT require a lock washer.

Before mounting Lag Screw, use factory drilled holes as guides to drill 1/8" (3.2mm) pilot holes

(Hammer into place) Do not crush wood!

## Step 1: Inventory Parts - Read This Before Starting Assembly

Inventory should be completed before starting installation. KidKraft will not cover costs of any additional installation trip due to missing or damaged pieces.

- **A.** This is the time for you to inventory all your hardware, wood and accessories, referencing the parts identification sheets. This will assist you with your assembly.
  - The wood pieces will have the key number stamped on the ends of the boards. Organize the wood pieces by step, as per the key numbering system below.

**B.** Read the assembly manual completely, paying special attention to ANSI warnings; notes; and safety/maintenance information on pages 1 - 8.

If there are missing or damaged pieces, please contact the KidKraft Consumer Engagement team before going back to the retailer.

## **Order Replacement Parts 24/7**

You can order replacement parts for this product 24 hours a day / 7 days a week:

Fig. 8.3

### Other Parts

- 1 x Sink
- 2 x Sink Knobs
- 1 x Faucet

## Step 8: Attach Counter Assembly Part 4

**H:** Place Sink and Stove in the openings of the Counter Assembly then attach 4 Mount Clips with included hardware to the bottom of the Sink and Stove to secure in place. (fig. 8.4 and 8.5)

Important: Use a hand held screw driver and DO NOT over tighten.

Note: To remove the Sink or Stove loosen screw 1/4 turn then twist Mount Clips

### **Other Parts**

1 x Stove

8 x Mount Clip

# Step 9: Attach Utensil Shelf

A: From inside the assembly attach 1 Utensil Shelf with 2 (S0) #8 x 7/8" Truss Screws as shown in fig. 9.1 & 9.2.

B: Attact the Pot, Pan and Spatula to Utensil Shelf. (fig. 9.2)

## **Step 19: Rockwall Assembly**

A: Lay 2 (9484) Rails down, side by side with angled edges facing down. (Fig. 19.1)

**B:** Place (9522) Board Rock on the top of each (9484) Rail as shown in fig. 19.1. **Do not attach**. This board is to be used as a guide only and will be attached in a later step. Make sure (9522) Board Rock is flush to the outside and top edges of each (9484).

C: Taking note of the hole orientation, place 1 (9485) Board Rock at the bottom of the (9484) Rails, making sure that it is flush to the edges and the bottom. Attach using 4 (S20) #8 x 1-3/8" Wood Screws. (Fig. 19.1)

**D:** In between the top and bottom board, evenly space the remaining (9485) Board Rocks, making sure that the pre-drilled rock holes are at opposite ends on each board. This will prevent rocks from forming a straight line. Attach using 4 (S20) #8 x 1-3/8" Wood Screws per board. (Fig. 19.1)

**E:** Alternating colors and shapes, place 1 rock on each (9485) Board Rock and attach using 1 (PB2) 1/4 x 1-1/4" Pan Bolt (with lock washer, flat washer and barrel nut) and 1 (S10) #8 x 1" Pan Screw per rock. The Screw must be in the hole directly under the Pan Bolt, this will stop the rock from spinning. (Fig. 19.2 & 19.3 &19.4.&19.5).

# Step 25: Roof Support Assembly Part 1

**A:** Place (9501) Top Swing flat on the ground with the angles facing up. The sharper angle should be on the right end. Place (9503) Roof Support as shown in fig. 25.1 making sure that it's flush with the edge of (9501) Top Swing.

**B:** Place (9502) Support Upright as shown in fig. 25.1, making sure that it's flush with the end of (9503) Roof Support and centered over the pre-drilled holes in (9501) Top Swing. Check to ensure that the assembly is square then attach boards using 4 (S4) #8 x 3" Wood Screws.

C: Repeat steps A and B to create a second assembly.

### **Wood Parts**

2 x 9501 Top Swing 1 x 2 x 56 7/16"

2 x 9502 Support Upright 1 x 2 x 10 5/8"

2 x 9503 Roof Support 1 x 2 x 34 1/16"

**Hardware** 

8 x (S4) #8 x 3" Wood Screw

# **Step 25: Roof Support Assembly Part 2**

**A:** Center 1 Triangle Canopy over the inside of each Roof Support Assembly. Make sure canopy is pulled tight during the installation. Attach using 10 (S5) #8 x 1/2" Pan Screws (#8 flat washer) per canopy. (Fig. 25.2)

### **Hardware**

20 x S5 #8 x 1/2" Pan Screw (#8 flat washer)

Other Parts
1 x Cozy Escape
Triangle Canopy Set

# **Step 26: Attach Roof Support Assembly**

**A:** Place 1 Roof Support Assembly across each end of the fort as shown in fig. 26.1. Make sure that assemblies are flush to the back and end wall panels and to the outside edge of the (9494) Crowsnest Uprights. Attach using 3 (S4) #8 x 3" Wood Screws per side. (fig. 26.1)

### **Hardware**

# Step 28: Large Roof Panel Assembly Part 1

**A:** Lay flat 3 (9511) Roof Bottoms. Place 1 (9504) Roof Sleeper Left along the top of the Roof Bottoms, taking note of the hole orientation. Attach (9504) Roof Sleeper to each (9511) Roof Bottom using 2 (S11) #8 x 2" Wood Screws. (fig. 28.1 & 28.2)

**B:** Place 1 (9519) Roof Sleeper Right along the bottom of the (9511) Roof Bottoms being careful to note the hole orientation. Attach (9519) Roof Sleeper Right to each (9511) Roof Bottoms using 2 (S11) #8 x 2" Wood Screws. (fig. 28.1 & 28.2)

**C:** Fit (9506) Roof Bottom A between (9519) Roof Sleeper Right and (9504) Roof Sleeper Left as shown in (fig. 28.1) Attach using 2 (S11) #8 x 2" Wood Screws per end.

**D:** Lay (9520) Roof Cover flat over the (9506) Roof Bottom A, making sure that it's flush with the edges of the assembly. Attach using 6 (S20) #8 x 1-3/8" Wood Screws. (fig. 28.3 & 28.4)

#### **Wood Parts**

# Step 28: Large Roof Panel Assembly Part 2

### Important: Do not over tighten hardware

**E:** Slide 1124 x 1067mm Roof Panel under (9520) Roof Cover so that it's tight to (9504) Roof Sleeper Left. (Fig. 28.5 & 28.6 & 28.9)

**F:** Place 370 x 1067mm Roof Panel in the remaining opening, under (9520) Roof Cover. The inside edge should overlap the Large Roof panel with the pre-drilled holes lining up. (Fig. 28.5 & 28.6 & 28.9)

**G:** Pre-drill all holes using a 1/8" drill bit, place Special Weather Cap brackets over each hole in the Roof Panels then attach using 1 (S20) #8 x 1-3/8" Wood Screw per bracket. Press the Special Weather Cap over the top of each screw.(Fig. 28.7 & 28.8 & 28.9)

# Step 29: Small Roof Panel Assembly Part 1

**A:** Lay flat 2 (9511) Roof Bottoms. Place 1 (9508) Roof Sleeper Short along the top of the Roof Bottoms taking note of the hole orientation. Attach (9508) Roof Sleeper Short to (9511) Roof Bottoms using 4 (S11) #8 x 2" Wood Screws. (fig. 29.1 & 29.2)

**B:** Place (9507) Roof Sleeper Short I along the bottom of (9511) Roof Bottoms taking note of the hole orientation. Attach using 4 (S11) #8 x 2" Wood Screws. (fig . 29.1 & 29.3)

**C:** Fit (9509) Roof Bottom B tight against (9511) Roof Bottom so that it lines up with the pre-drilled holes in the ends of (9508) Roof Sleeper Short and (9507) Roof Sleeper Short I. Attach using 2 (S11) #8 x 2" Wood Screws per end. (fig . 29.1 & 29.2 & 29.3)

**D:** Place (9512) Roof Cover over the top of (9509) Roof Bottom B, (9508) Roof Sleeper Short and (9507) Roof Sleeper Short I, making sure that it is flush with the edges. Attach using 6 (S20) #8 x 1-3/8" Wood Screws (fig. 29.4 & 29.5)

# Step 32: Slide Section Assemblies Part 1

Note: When installing Pan Bolts make sure to look at holes so bolts go through the side with the round recess and the lock nuts go through the side with the hexagonal recess. (fig. 32.3)

**A:** Fit 2 TNR2 Slide Elbows together and attach with 8 (PB1) 1/4 x 3/4" Pan Bolts (with lock nut) as shown in fig. 32.1. It is very important to attach bolts as indicated.

**B:** Repeat Step A 3 more times to create 4 Elbow Sections in total.

**C:** Attach TNR3 Extended RT Flange and TNR3 Extended LT Flange together using 9 (PB1) 1/4 x 3/4" Pan Bolts (with lock nut) as shown in fig. 32.2. This creates the Flange Assembly.

# **Step 33: Attach Flange Assembly to Fort**

**A:** With a helper place the Flange Assembly in the opening so that it's flush to the (9514) Mid Cross as shown in fig. 33.1 & 33.2. Pre-drill 1/8" pilot holes in the bottom 4 mounting locations (approximate spots where circles are on figure), making sure the pre-drilled holes are a minimum of 2.5 cm (1") deep. (fig. 33.1)

**B:** Attach Flange Assembly to bottom of opening using 4 (S7) #12 x 2" Pan Screws in the pre-drilled holes. (fig. 33.1) Make sure the flat surfaces of the Flange Assembly are flush to the (9514) Mid Cross as shown in fig. 33.3.

**C:** Attach the Flange Assembly flush to top of (9514) Mid Cross opening using 4 (S6) #12 x 1" Pan Screws as shown in fig. 33.1 and to both sides using 5 (S6) #12 x 1" Pan Screws per side. (fig. 33.1)

# Step 35: Attach Elbow Assembly to Flange Assembly

Note: Keep all bolts loose until further step.

**A:** Fit one of the Elbow Assemblies to the Flange Assembly by lining up the arrows on each assembly. Attach Elbow Assembly to Flange Assembly using 6 (PB1)  $\frac{1}{4}$  x  $\frac{3}{4}$ " Pan Bolts and Square Lock Nut. (fig. 35.1, 35.2 and 35.3)

**B:** Attach one of the Elbow assemblies to another Elbow Assembly making sure to line up the arrows on each assembly. Attach 6 (½ x 12.7)mm Pan Bolt with Square Lock Nut. Repeat this instruction for 2 more. (fig. 35.2 and 35.3)

### Other Parts

1 x Quadrex Driver 24 x 1/4 x 12.7mm Pan Bolt 24 x 1/4" Square Lock Nut

# Step 36: Attach TNR 3 Slide Exit to Elbow Assembly

A: Insert flange of Exit Elbow Assembly (slide elbow) into the slots on TNR3 Short Exit. (fig. 36.1)

**B**: Rotate Slide Exit and use Quadrex Driver as a guide pin so the holes are aligned and attach with 5 (PB1) 1/4 x 3/4" Pan Bolts (with lock nuts) starting with the bottom middle hole and working up each side. (fig. 36.2 and 36.3)

**C:** At this point make sure all the slide bolts are tight.

# Step 37: Attach Exit End Assembly to Fort

**A:** Fit the Exit End Assembly to the last Elbow Assembly by lining up the arrows on each assembly. Notice the elbow orientation. (fig. 37.1). Attach with 6 ( $\frac{1}{4}$  x 12.7)mm Pan Bolts and Square Lock Nuts. (fig. 37.2)

### **Other Parts**

6 x 1/4" x 12.7mm Pan Bolt 6 x 1/4" Square Lock Nut

## Step 38: Attach TNR 4 Clamp Rings

**A:** Place 2 TNR4 Clamp Rings around each joint making sure to match the arrows with the end of the Clamp Ring as shown in (fig. 38.1 & 38.2).

**B:** Connect TNR4 Clamp Rings in 2 spots using 1 (PB6) ½ x 1" Pan Bolt (with lock nut) per side. (fig. 38.3)

Note: When installing Pan Bolts make sure to look at holes so bolts go through the side with the round recess and the lock nuts go through the side with the hexagonal recess.

Note: For ease of assembly bottom set of clamp rings can be rotated 90 degrees to install bolts.

Make sure arrows are aligned

# Step 40: Attach Elbow Assemblies and TNR4 Slide

**A:** Place 1 TNR4 Post Mount Clamp on either side of the Clamp Ring so that the bent tops clip in behind the Clamp Ring. (fig. 40.1 & 40.2)

**B:** Insert the TNR4 Post Mount Base in between the 2 Post Mount Clamps and screw all pieces together using 1 ½ x 14.5mm Pan Head Bolt and Square Nylock Nut. (fig. 40.2)

C: Attach TNR4 Post Mount Base to (9493) Groud Brace C, pre-drill with a 1/8" drill bit then attach with 2 (S6) #12 x 1" Pan Screws. (fig. 40.2)

**D:** Attach the Post Mount Clamp to the clamp ring using 1 (S37) #7 x 5/8" Pan Screw. (fig. 40.2)

## Step 41: Attach TNR 3 Slide to Fort

A: On the fourth attached Elbow Assembly remove the pan bolt and nut which is facing the fort (installed in Step 32). (fig. 41.1) The bolt will no longer be needed, but keep the lock nut.

B: Loosely attach TNR3 Tube Support (at the slightly bent end) to the slide seam using 1 (PB6) 1/4 x 1" Pan Bolt (with flat washer and the previously removed lock nut). (fig. 41.2)

C: Rotate TNR3 Tube Support and attach to (9266) Folding Panel Assembly Right B using 1 (S6) #12 x 1" Pan Screw as shown in (fig. 41.2).

**D:** Fully tighten screw and bolt.

## **Step 42: Install Ground Stakes**

## MOVE FORT TO FINAL LOCATION PRIOR TO STAKING FINAL LOCATION MUST BE LEVEL GROUND

**A:** In the 6 places shown in fig. 41.1 drive the Rebar Ground Stakes 13" (33cm) into the ground against (9265) Folding Panel Assembly Left B, (9264) Folding Panel Assembly Left A, (9490) Groud Brace, (9491) Ground Brace A. Be careful not to hit the washer while hammering stakes into the ground as this could cause the washer to break off. (fig. 42.1 and 42.2)

B: Attach Ground Stakes using 1 (S7) #12 x 2" Pan Screw per ground stake as shown in fig. 42.3.

**C:** After driving stakes into the ground, check for sharp edges caused by the impact of the hammer. Smooth any sharp edges from impact area and touch up with outdoor paint.

Fig. 42.1

Warning! To prevent tipping and avoid potential injury, stakes must be driven 13" (33cm) into ground. Digging or driving stakes can be dangerous if you do not check first for under-ground wiring, cables or gas lines.
