

QUESTION

1. A company has a current ratio of 1.5 and a debt-to-equity ratio of 0.5. If the company's current assets are \$100,000, what are its current liabilities and total debt?

Item	Value
Current Assets	\$100,000
Current Liabilities	\$66,667
Total Debt	\$33,333

ANSWER: Current Liabilities = \$66,667; Total Debt = \$33,333

QUESTION

2. A company has a current ratio of 1.5 and a debt-to-equity ratio of 0.5. If the company's current assets are \$100,000, what are its current liabilities and total debt?

Item	Value
Current Assets	\$100,000
Current Liabilities	\$66,667
Total Debt	\$33,333

ANSWER: Current Liabilities = \$66,667; Total Debt = \$33,333
