

**QUESTION**  
 The following table shows the number of students who took part in a school sports competition. The table is divided into three categories: Football, Basketball and Tennis. The number of students who took part in each category is given in the table below.

| Category   | Number of Students |
|------------|--------------------|
| Football   | 120                |
| Basketball | 80                 |
| Tennis     | 60                 |

**ANSWER**  
 The total number of students who took part in the competition is the sum of the number of students in each category. This is calculated as follows:  
 Total number of students = 120 + 80 + 60 = 260  
 Therefore, the total number of students who took part in the competition is 260.

## SOLUTION
