THE ORIGINATOR OF ELECTRONIC DARTS: ARACHNID, INC.

The high technology electronic dart games we play today bear little resemblance to the medieval versions that evolved from the pastime of the royal courts. Arachnid, Inc. invented the state-of-the-dart technology that brought the popular pub game into the home, in the process earning a stellar reputation for quality and innovation, recognized today all over the world.

Your electronic soft-tip dart game is a precision engineered product manufactured with the highest quality materials, and is designed to provide years of action-packed fun to players of all skill levels and ages.

DART HISTORY

The first "dart" was most likely thrown by prehistoric man some 35,000 years ago. A sharpened antler attached to a wooden shaft allowed hunters to kill an animal from a distance, even as it ran. In one form or another, from spears, to arrows, to the present dart we use for games of skill, the art of throwing a pointed shaft with accuracy has been a part of almost every culture.

Later in history, Henry VIII of England and Charles VI of France were both avid enthusiasts of dart throwing games derived from warfare and archery contests.

The modern game evolved during the nineteenth century in English pubs. Often a barrel head was used as the target, with the centrally located cork becoming the bull's-eye. The term "cork" is still occasionally used today when referring to the bull's-eye.

At one time darts were considered a game of chance, and were actually illegal in England until 1908, when a Leeds innkeeper went to court to challenge the law. Fortunately he was able to demonstrate to the court's satisfaction that darts were indeed a game of skill.

Between the two World Wars playing darts for fun and relaxation became more and more popular in England. American servicemen stationed there in World War II often brought the game home with them where it eventually became popular in the United States as well.

UNPACKING THE GAME

MOUNTING INSTRUCTION

1. Choose a location to hang the board that is near an electrical outlet, and that has at least 10 feet of open floor space in front of the board.
2. Locate a wall stud, and place a mark 76" (193.04cm) up from the floor along the stud (see illustration above). Place another mark 15 5/16" (38.89cm) below the first mark. Drill a small pilot hole into each reference mark, then screw in #1 screw 10-16x1 3/4" long slotted truss-head mounting screw (provided) into each pilot hole until the screw head is protruding about 1/2" (12.7mm) from the wall.
3. Line up the slotted mounting holes on the back of the game with the screw heads, and then mount the game.
4. It may be necessary to adjust the screw until the board fits snugly against the wall. After the board is mounted, the bulls'-eye should be 68" (172.72cm) above the floor.
5. Place a toe line 97 1/2" (248cm) from the wall as a guide for throwing distance. In tournament play adhesive tape 2 feet long by 2 1/2 inches wide is used, but if it is not available, a strip of household masking tape will suffice.
6. The device is powered by an AC to DC 9V (300mA) adapter with positive center pole supplied with the game. To connect, insert the round barrel-type power plug into the lower left side of the dart board (as you face it) and the two-prong power adapter plug into an electrical outlet.

Also this device is equipped with battery operated option (battery not included). You may remove the battery cover from the back & insert 4xAA cells according to the battery placement direction as marked.

GAME INSTRUCTIONS

G01 301 (Game option: L01, L02, L03, L04)

Each player begins with 301 points, and must reach exactly zero to win. The score of each dart thrown is subtracted from the beginning score of each round. Exceeding zero causes the player to “Bust”, and the score returns to what it was before that round. There are six options for the game, namely:

Option Code	L01	L02	L03	L04
START / END	Single In / Single Out	Single In / Double Out	Double In / Single Out	Double In / Double Out

Single In : The player can hit any segment on their first dart to start.

Single Out : The player can hit any segment on their last dart to finish the game.

Double In : The player must hit a double or double bullseye on their first dart to start.

Double Out : The player must hit a double or double bullseye on their last dart to finish the game. (Reaching a score of 1 will “Bust” since it is not possible to double out with 1 point)

G02 501 (Game option: L01, L02, L03, L04)

This game is played the same as 301, except each player starts with 501.

G03 601 (Game option: L01, L02, L03, L04)

This game is played the same as 301, except each player starts with 601.

G04 701 (Game option: L01, L02, L03, L04)

This game is played the same as 301, except each player starts with 701.

G05 801 (Game option: L01, L02, L03, L04)

This game is played the same as 301, except each player starts with 801.

G06 901 (Game option: L01, L02, L03, L04)

This game is played the same as 301, except each player starts with 901.

G07 GOTCHA! (Game option: L01, L02)

Each player begin with 0 point and must reach 301 exactly to win. Players can “Bomb” other players which reduce their score to zero. This happen when the shooting player equals another player’s score with any dart thrown. Therefore it is possible to bomb 3 players in 1 turn. Example:

Player 1’s score is 20

Player 2’s score is 50

Player 3’s score is 30

Player 4’s score is up. The first dart thrown hits the 20 – Player 1 gets bombed and goes

to zero. The second dart hits the 10 (score now 30) – Player 3 gets bombed and goes to zero. The third dart hits a 20 (total score is 50) – Player 2 gets bombed and goes to zero.

If a player exceeds 301 points that player will bust and the following occurs:

In single player game, no “Bombs” will go off.

L01 : The player’s score reverts to what it was before and darts were thrown in that round

L02 : The number of points that were of 301 also reduces that score.

G08 QUICK CRICKET (Game option: L01, L02, L03)

Quick Cricket is played with the number 15 through 20 and the bull’s-eye. The first player marks a number three times & ‘open’ all the number is the winner. Marks are indicated in the tri-colored lights scoring system at the bottom of the board. One mark is indicated by a green light, two by an amber light, and three by a red (when number is closed). Double count as two marks, and triples as three. No score is required in this game.

L01 : hit & ‘open’ the numbers 15-20 and bull’s-eye at any order

L02 : hit & ‘open’ the numbers 20 first, then in order ‘open’ numbers 19, 18, 17, 16, 15 & bull’s-eye

L03 : hit & ‘open’ the bull’s-eye first, then in order ‘open’ numbers 15, 16, 17, 18, 19 & 20

G09 CRICKET (Game option: L01, L02, L03)

Cricket is similar to the Quick Cricket, in addition, player scores a points by hitting his ‘opened’ cricket number (15 through 20 and bull’s-eye). No score can be made for the number that has been closed by all the players. The winner is the first player to close all the numbers and have the highest score among all players.

L01 : hit & ‘open’ the numbers 15-20 and bull’s-eye at any order

L02 : hit & ‘open’ the numbers 20 first, then in order ‘open’ numbers 19, 18, 17, 16, 15 & bull’s-eye

L03 : hit & ‘open’ the bull’s-eye first, then in order ‘open’ numbers 15, 16, 17, 18, 19 & 20

G10 SHANGHAI (Game option: L01, L02, L03, L04, L05, L06, L07, L08, L09, L10, L11, L12)

The score windows display the target number for each round. The target number varies with round and starts from 1 through 2, 3, 4, ..., 20 to bull’s-eye. The player gets scores on a hit of target number. Throw 3 darts for each number and the player who gets the most scores wins. There are 3 levels of difficulty and player can score at any right segments (Single X1, Double X2, Triple X3) for level L, and only double, triple will count for level X.

Also players can select super Shanghai (Level P) as a complementary option. The rules are the same as above except various doubles and triple must be hit as specified by the computer. The computer will display the chosen “double” or “triple” and display the number at the scoring window.

G11 CUT THROAT CRICKET (Game option: L01, L02, L03)

Cut Throat Cricket is played the same as Cricket except when a player closes a number and begins scoring, the scores are given to all opponents that do not have that number closed. The winner is the first player that closes all the numbers and has the lowest or equal score.

- L01 : hit & 'open' the numbers 15-20 and bull's-eye at any order
- L02 : hit & 'open' the numbers 20 first, then in order 'open' numbers 19, 18, 17, 16, 15 & bull's-eye
- L03 : hit & 'open' the bull's-eye first, then in order 'open' numbers 15, 16, 17, 18, 19 & 20

G12 SCRAM CRICKET

Scram Cricket is a variation of Cricket. The game consists of 2 rounds. In the first round, player 1 has to 'close' 15-20 and bull's-eye, whilst player 2 attempts to get as many scores as he can by hitting the numbers that are still open. Round 1 will be finished if all numbers have been closed. For round 2, the reverse is practiced. The one with the most scores is the winner.

G13 DOUBLE ONLY CRICKET (Game option: L01, L02, L03)

Double Only Cricket is played the same as Cricket except that a double of each cricket number must be hit before a player can go further with that number. Once a double is hit, that number is opened. That double together with the other doubles, triples and singles of that number count.

For example, to start the 20's each player has to hit double 20 to open this number. Afterward, a single 20 would close the number, or a double would close and score 20 points, similarly a triple would close and score 40 points. It is impossible to close a number with one dart.

- L01 : hit & 'open' the numbers 15-20 and bull's-eye at any order
- L02 : hit & 'open' the numbers 20 first, then in order 'open' numbers 19, 18, 17, 16, 15 & bull's-eye
- L03 : hit & 'open' the bull's-eye first, then in order 'open' numbers 15, 16, 17, 18, 19 & 20

G14 ALL FIVES (Game option: L01, L02, L03, L04, L05)

Each round each player has to score a total divisible by 5, and every divisible '5' counts one point. For instance 2, 8, 5 with a total 15, player can get 3 points as 15 divided by 5 is three.

There is no point if:

- a. The round (3 darts) total scores is not divisible by 5
- b. Any dart is missed even though the sum of other darts is divisible by 5

The first player who gets scores of 51 or above will be the winner

Option Code	L01	L02	L03	L04	L05
Goal score	51	61	71	81	91

G15 DOUBLE DOWN

The game starts with a base score of 60 for each player. The player has to score by hitting the active segments of the current round. For instance, in 1st round, the player must throw for the 15 segment. If no 15's are hit, the player's score will be cut by half. The next round is 16 and so on. For Double and Triple, player has to hit any double or triple and the same rule will be applied.

Round	1	2	3	4	5	6	7	8	9
Active Segment	15	16	Double	17	18	Triple	19	20	Bull's-eye

TROUBLE SHOOTING

We are proud of being the originator of the electronic dart board, so we build our boards to be rugged and durable. However, with the delicate electronics in our device, and with the high usage the device may receive, there is a chance that a problem may eventually occur.

No Power

POOR OUTLET CONNECTION. Check the power cord to make sure that it is properly plugged in. Check the circuit breaker (or fuse) in the home to verify that there is power to the electrical outlet.

Devices will not score or no sound

Check to see if a segment is stuck. Also be sure that all buttons are not stuck.

Stuck Segment

If a segment is stuck, the text window will display a message just like "Error=03" to indicate which segment is stuck.

03 : single segment #3
=03 : double 3 segment
≡03 : triple 3 segment

This is usually caused by a broken tip. A long tip that sticks out from the segment surface may be pulled out with pliers. A short tip that is broken off flush with the segment surface can be pushed through the hole into the device without damaging the electronics in the dart-head. Push the tip with an object that is smaller in diameter than the tip.

Electrical storms, power line surges, rolling brown outs, broadcast radio/TV transmitters:

Notice

Under extreme electrical interference conditions of these types, the dart game can show erratic behavior and fail to continue to perform. To restore device to normal operation, disconnect all power sources from the device unit. Unplug adapter and wait for 3 seconds. Reconnect power sources.

Cleaning the Device

The Arachnid, Inc. dart board will provide many hours of fun if cared for properly. Do not use spray cleaners, or cleaners that contain ammonia, acetone, or other harsh chemicals as they may cause damage. Instead, we suggest regular dusting with a damp cloth. Use a mild detergent and damp cloth for more vigorous cleansing. It is a good idea to first test cleaning solutions on an inconspicuous area of the game. Note: Spilling liquids onto the game, exposure to weather, or user abuse (such as dropping the game) can result in permanent damage, and are not covered by the warranty.
