

# QUESTION

1. The following diagram shows the structure of a cell wall. The cell wall is made of cellulose, which is a polysaccharide. The cellulose molecules are arranged in a regular, repeating pattern, forming a mesh-like structure. This structure provides the cell wall with strength and rigidity, allowing it to maintain its shape and resist external pressure.

2. The diagram shows the structure of a cell wall. The cell wall is made of cellulose, which is a polysaccharide. The cellulose molecules are arranged in a regular, repeating pattern, forming a mesh-like structure. This structure provides the cell wall with strength and rigidity, allowing it to maintain its shape and resist external pressure.

3. The diagram shows the structure of a cell wall. The cell wall is made of cellulose, which is a polysaccharide.
