

MOTION-ACTIVATED RV STEP LIGHT

The Lippert motion-activated RV step light illuminates your outdoor living space, providing safety for you and your family as you enter and exit your rig, walk around the campsite or any other place you need motion-activated light around your home, boat or vehicle.

REQUIRES: Six (6) AA
batteries (not included)

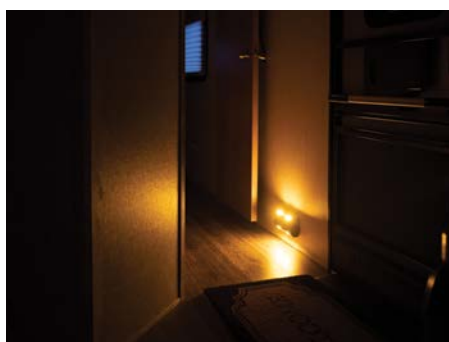

BRINGING SAFETY TO YOUR CAMPSITE, BOAT AND HOME

Easy Magnetic Attachment

Includes adhesive-backed metal plate for attachment on non-magnetic surfaces

Use Indoors & Outdoors

Bring the light inside the coach to illuminate the dark areas (hallway, kitchen, etc.)

Intuitive Sensors

With an integrated light sensor, our camper step light can extend the life of its batteries by only activating when it's dark outside

When the power switch is in the ON position, the motion detector will trigger the camper step light to illuminate when movement is detected in the surrounding area. It will turn on for 15 seconds before shutting off if no further activity is detected.

Additional Features

- Illuminates the area around your RV steps for safe entry and exit
- High strength magnets easily attach to the bottom of your RV steps
- Two amber LED lights with a diffusion panel offer a soft nighttime glow
- Magnetic attachment allows easy removal for standalone flashlight use
- Integrated light sensor prevents light activation during daylight hours
- Motion sensor activates lights for 15 seconds when movement is detected
- IP65 rated for harsh outdoor environments
