

The graph shows the relationship between the number of people and the number of people per room. The x-axis represents the total number of people, and the y-axis represents the number of people per room. The curve indicates that as the number of people increases, the number of people per room decreases, following a hyperbolic-like trend.

QUESTION

The diagram illustrates a large rectangular area divided into several smaller rectangular rooms. The rooms are arranged in a grid-like pattern, with some rooms being larger than others. The diagram is used to illustrate the concept of people per room.

The diagram shows a large rectangular area divided into several smaller rectangular rooms. The rooms are arranged in a grid-like pattern, with some rooms being larger than others. The diagram is used to illustrate the concept of people per room.
