Now it's time for you to experiment and come up with your own unique stunts!

Remember, there are many ways to throw the planes and each plane may react differently. You cannot always control exactly what your plane will do, but no matter what you will have fun.

products that meet or exceed U.S. Our open-ended products offer fun-filled opportunities safety standards as determined by for children to create, pretend, independent laboratory testing.

CREATE A FLEET OF EASY-TO-ASSEMBLE AIRPLANES TO DETAIL AND FLY

Caution - Although the markers included in your kit are washable from skin, it's a good idea to wear old clothes and cover your work area. Clean up any marker right away.

BUILDING THE PLANES

Each plane has three pieces: the body, main wing and tail wing. To assemble, simply slide the pieces together. Be sure the wings are facing the correct direction as shown.

CUSTOMIZE

Color in your stickers with cool marker accents.

Note: If your planes should become wet, the stickers may fall off. Save your markers and any leftover stickers for touch up and repairs.

UP-UP AND AWAY!

Before you take your planes out for a test flight, here are some pre-flight instructions.

- Although your planes are soft, never throw them directly at people or pets.
- Be sure the flight path is clear. If you are playing indoors, avoid flying them near objects that could break.
- Use caution when playing outdoors. Look before you throw and be aware of your surroundings.

BASIC FLIGHT

Using your thumb and index finger, hold the base of your plane just below the wings. Pull your arm back, push it forward and watch your plane soar!

GOING THE DISTANCE

Since there are 5 planes in the kit, why not invite your friends over to play? You can compete to see who can fly the farthest or set up a target to see who can come closest.

Once you have mastered the basics, here are some fun stunts for you to try:

SIDEWAYS FLIGHT

Hold the plane on its side. As you throw it, watch it spin and do a nose dive.

UPSIDE DOWN

Holding the plane upside-down, throw it and watch it barrel roll and dive.

WING FLING

Hold the plane on the wings and throw.
