

## Product Description

**TEF1105P-4-63W** is a 5-port 10/100Mbps unmanaged switch that requires no configuration and provides 4 PoE ports. It can automatically detect and supply power to all IEEE 802.3af/at-compliant Powered Devices (PDs). Enabling "Ethernet Extend Mode" makes Ports 1-4 negotiate to 10M full-duplex rate and isolated from each, but all communicate with the Uplink port. In this mode, the transmission distance can be up to 250m. In this situation, that the electrical power is transmitted along with data in one single cable allowing you to expand your network to where there are no power lines or outlets, where you wish to fix devices such as APs, IP Cameras or IP Phones, etc.

## Features

When the Extend mode is enabled, its data transmission and power supply distance can be up to 250 meters

One-key VLAN setup helps isolate DHCP broadcast packets, thus preventing IP conflicts in the LAN
