

The diagram illustrates the process of aligning a square tile with a circular hole in a rectangular base. A hand is shown holding the tile, which has a circular hole in its center. The tile is being positioned above the base, which also has a circular hole. A vertical line indicates the alignment of the hole in the tile with the hole in the base.

This step is crucial for ensuring that the tile is properly aligned with the base. The hand is shown holding the tile from the side, and the vertical line indicates the alignment of the hole in the tile with the hole in the base.

## FACE TILE

This diagram shows the rectangular base with a hole. The base is divided into three vertical sections. The middle section is shaded and contains a vertical line. The left and right sections are unshaded and contain circular holes.
