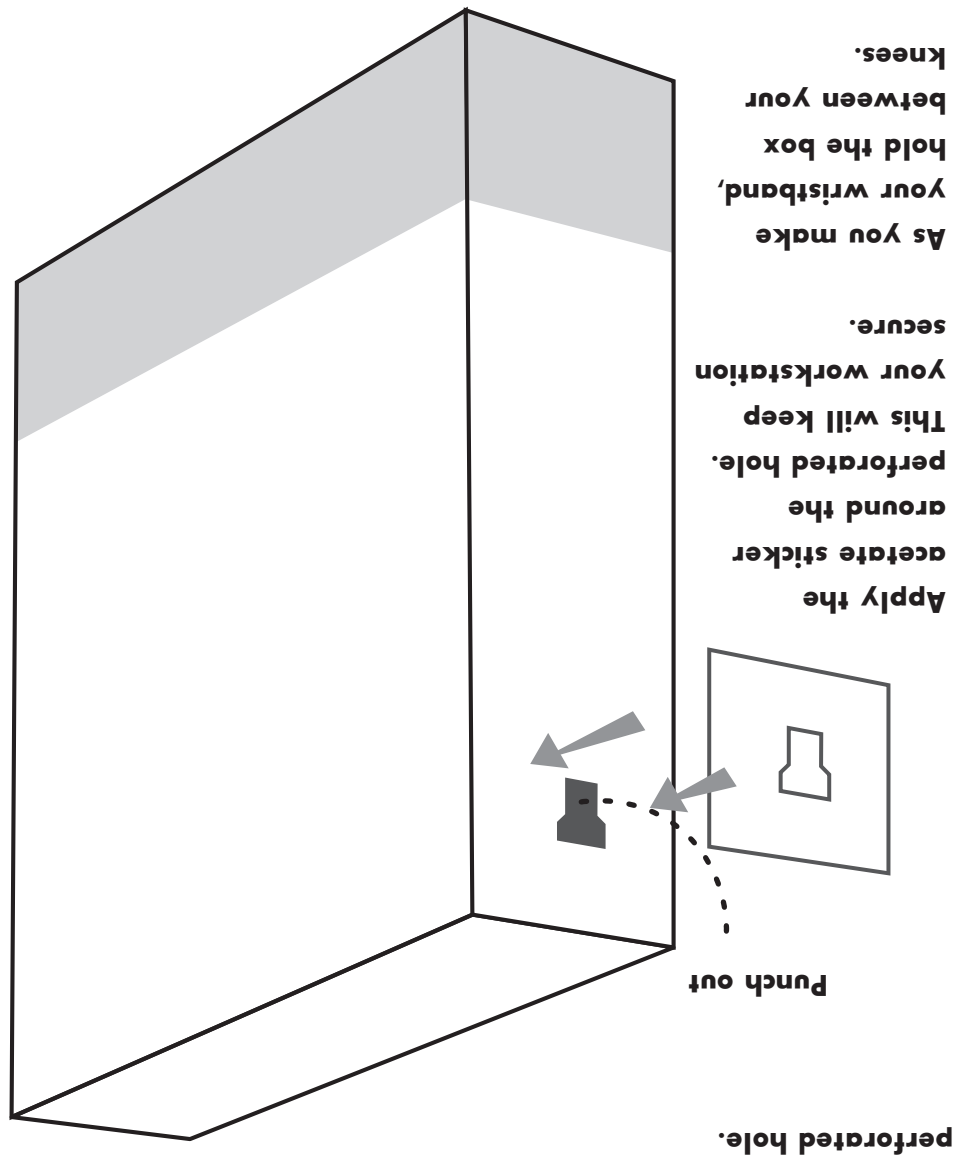
YOUR WORKSTATION

The side of your box features a neat workstation for you to create cool paracord wristbands. Carefully punch out the perforated hole.



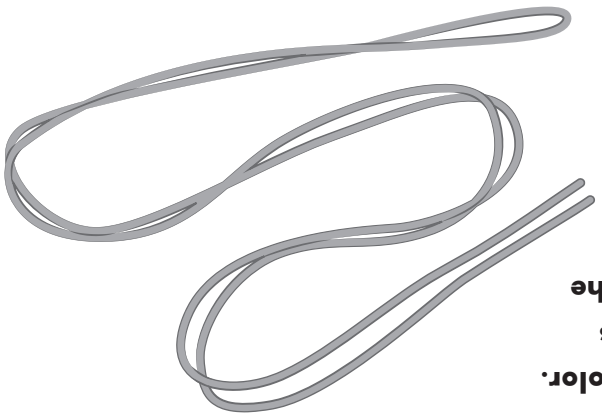
Fun Fact - Paracord was originally used to suspend parachutes. Today this cord has many uses, including wristband making.

Apply the acetate sticker around the perforated hole. This will keep your workstation secure.

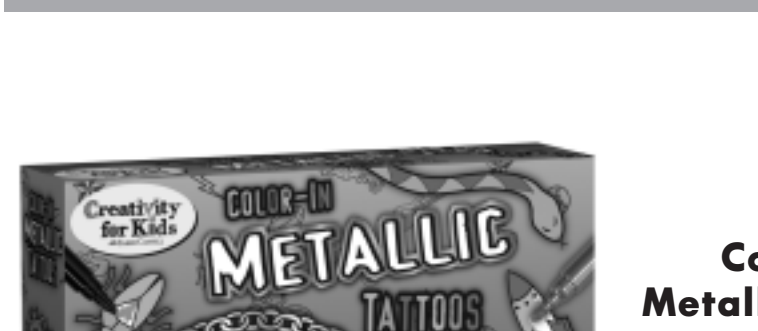
As you make your wristband, hold the box between your knees.

PREPPING YOUR WRISTBAND

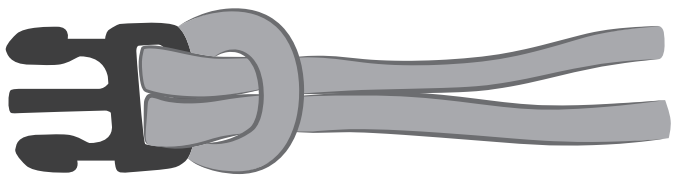
Select a paracord color. Match the two tails together and find the center of the cord.



Pull the center of the cord through the buckle as shown.



And pull the tails through the loop.



Rehook the other side of the buckle and pull the tails through.

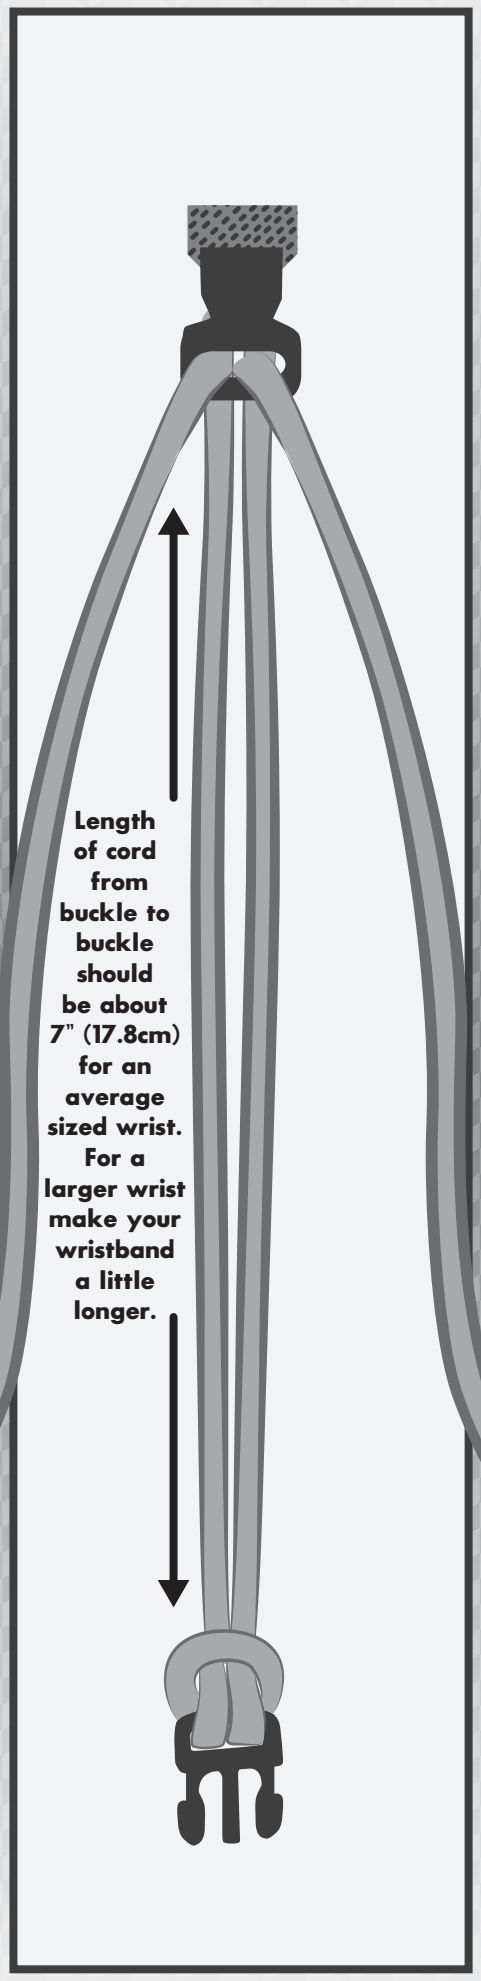
Designed in USA • Made in China • Conforms to ASTM D-4236 • Non-toxic Safe for Children

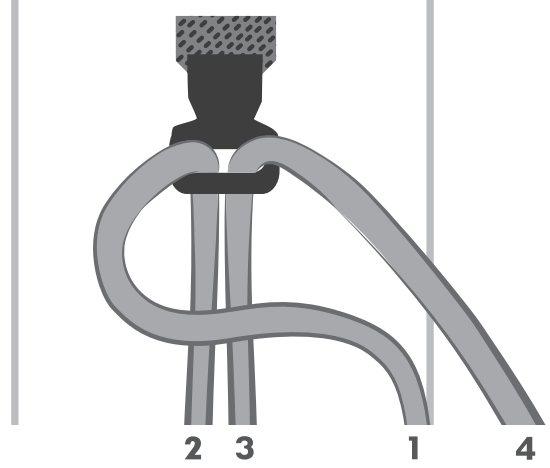
CREATING YOUR WRISTBAND

Unhook the buckle and insert it into the workstation on the side of your box as shown.



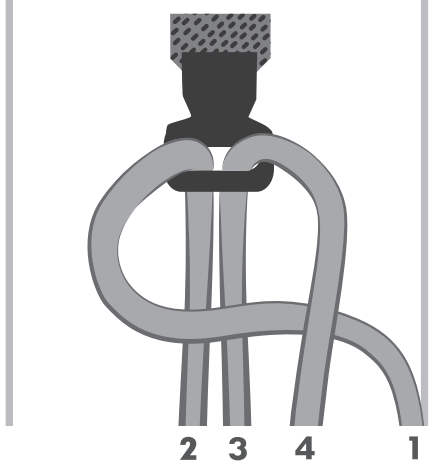
Line the bottom buckle up with the picture printed on the side of the box.

1



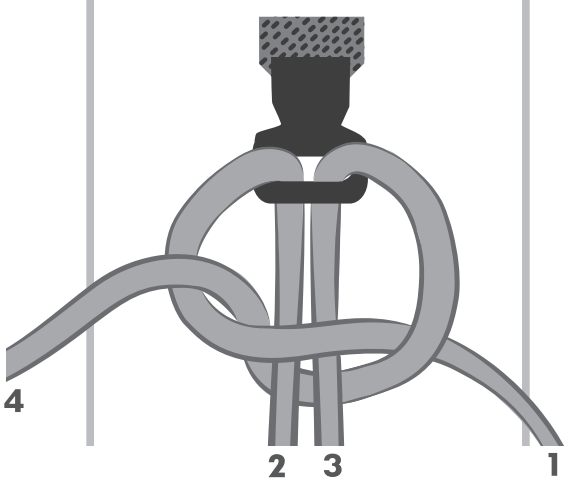
Cross the left cord (1) over the two center cords (2 and 3), creating a loop on the left side.

2



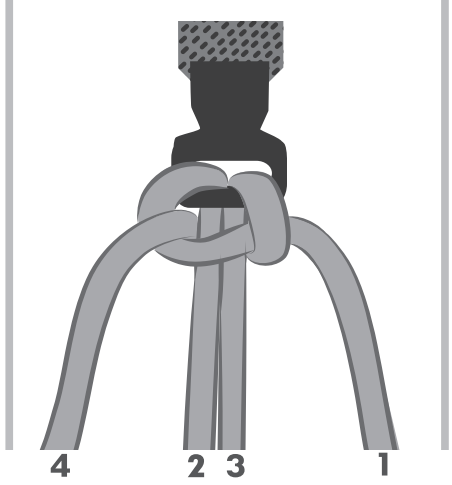
Place the right cord (4) over the left cord (1).

3



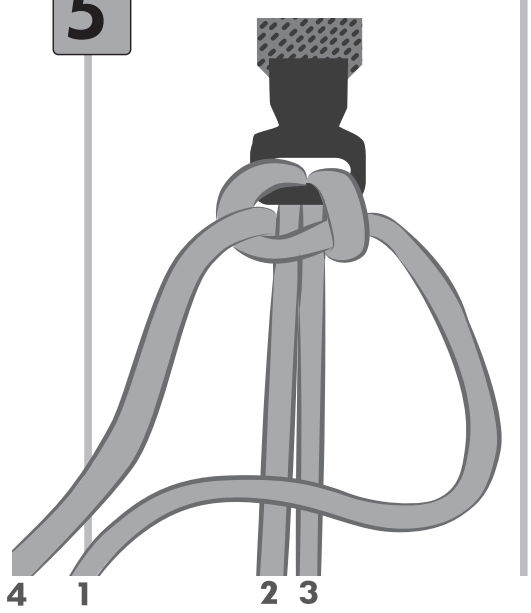
Pass the right cord (4) under the two center cords (2 and 3) and up through the loop you made on the left.

4



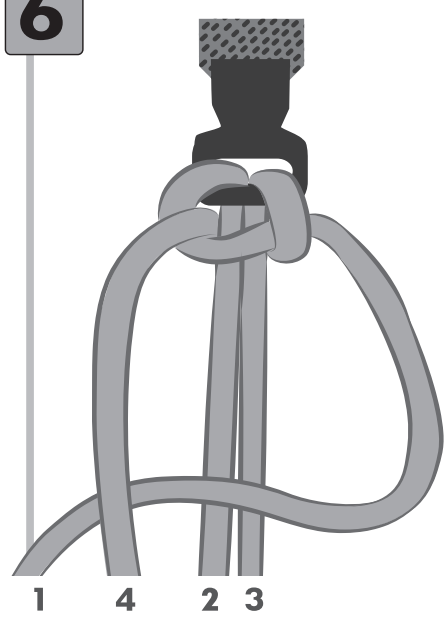
Pull left and right cords (1 and 4) to tighten the knot.

5



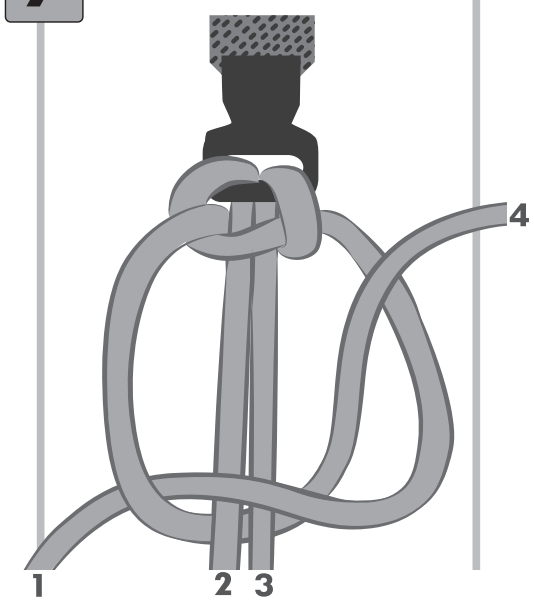
Tie the same knot starting on the right side. Cross the right cord (now 1) over the center cords (2 and 3) creating a loop on the right side.

6



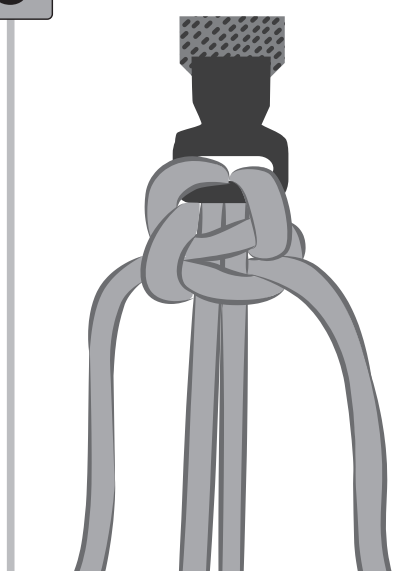
Cross the left cord (now 4) over the right (1).

7



Pass the left cord (4) under the two center cords (2 and 3) and up through the loop you made on the right.

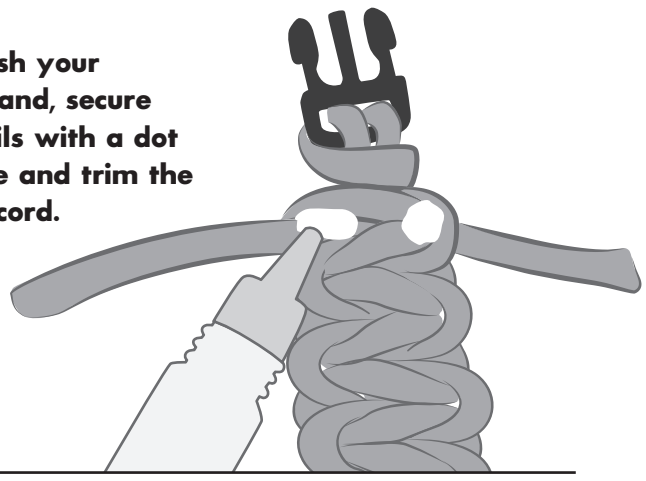
8

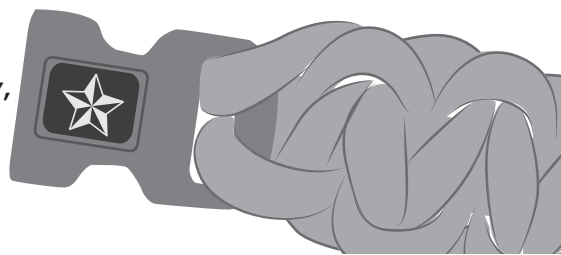


Pull the left and right cords (1 and 4) to tighten the knot.

Follow the steps and continue making knots until you reach the buckle at the other end.

To finish your wristband, secure the tails with a dot of glue and trim the extra cord.





Once the glue is dry, accent your buckle with a sticker.
