Pace®

## High Impact Floor Cleaning System with Microfiber Pads

An efficient, versatile cleaning tool that can be used in busy areas or to manage infection control.

### Features & Benefits

- Cleans twice as fast as mop and bucket
- Use up to 90% less water and chemicals which reduces slip/fall risks
- Spray nozzles ensure chemical goes on floors and not walls and furniture
- Color-coded chemical bottles reduces risk of error or incorrect solution being used
- Light and much more maneuverable than traditional mop and bucket system

### Applications

- Use for damp, wet or disinfection and dry mopping
- Meets the needs of day porter, building service and infection control cleaning operations

**Use Directions**

- Fill and place the color-coded chemical bottle on Pace® Floor Cleaning System.
- Attach a microfiber pad.
- Pressurize the bottle and clean.

**Pad Removal and Laundering**

- Simply remove the microfiber pad from the cleaning tool by pulling on the tag.
- Place in washing machine for easy cleaning.
- Refer to washing instructions for proper care.
- Pace® microfiber pads are guaranteed for up to 500 washes when laundering instructions are followed.
