- Use to lock the cam gears in place, retaining valve timing during belt replacement
- For single, dual or quad cam engines, also works well during diesel injection pump belt replacement
- Clamp between the engine block or head and the back of the gear to lock it in place
- No one likes the time and expense of retiming the engine, this cam lock is the perfect solution
- Universal design fits many engines, and installs in seconds without tools
- High impact plastic and steel construction provides years of repeated use
