

GROUND CONTROL®

LEVELING SYSTEMS

NEXT LEVEL RVING

Lippert™ has developed a range of one-touch automatic leveling solutions to enhance every RV setup. We've made it faster, easier and simpler to get your RV up and running at the campsite and to maintain a stable and safe foundation for the RV lifestyle.

Whenever, wherever, we
make your experience better.

ONE-TOUCH AUTOMATIC LEVELING

Ground Control TT travel trailer leveling

Ground Control TT levels and stabilizes your travel trailer quickly and accurately. It's a long and difficult process to get an RV level with manual jacks, chocks and wedges. Ground Control TT levels and stabilizes the travel trailer in a matter of minutes

Additional Features

- First-ever automatic leveling system designed for travel trailers
- Automatic, one-touch electric leveling
- Under three minutes to level
- Fully electric system - no hydraulics
- Compatible with OneControl® wireless technology
- Maximum gross vehicle weight rating (GVWR) of 10K lbs.
- Only compatible with travel trailers with an i-beam frame

Ground Control 3.0 5th wheel leveling

Stop wasting time with manual jacks and chocks. Get the kit that gives your RV automatic stabilization with the push of a button. Less hassle. More time to enjoy your campsite

Additional Features

- Electric stabilization system for 5th wheel RVs
- Available in 4- and 6-point bolt-on configuration
- Wireless, one-touch remote included
- Saves significant time setting up your campsite
- Hall Effect technology measures revolutions, not amps, ensuring more accurate leveling
- Auto re-hitch memory function
- Enhanced stability with rear round leveling jacks
- Includes all necessary hardware for installation
- 15.5K lbs. total lift capacity
