- For pulling jobs requiring an internal pull, such as pilot bearings when you can only access from one side
- Designed especially for pilot bearings, and needle bearings
- Easy to use, insert and expand the collet to fit inside the center of the bearing, and attach the slide hammer assembly
- 1.36 kg. (3 lb.) hammer and T-handle are plated for smooth operation and to protect against corrosion
- Manufactured with high-quality carbon steel, providing high strength, and a long service life
- 8 bearing extractor collets with internal capacity from 9 mm (11/32 in.) to 34 mm (1-5/16 in.)
