

This diagram illustrates the components of a mechanical assembly. The assembly consists of a central shaft, a gear, a pulley, a belt, and a vertical component. The gear is mounted on the left end of the shaft, and the pulley is mounted on the right end. The belt is wrapped around the pulley, and the vertical component is attached to the shaft.

## QUESTION

This diagram illustrates the components of a mechanical assembly. The assembly consists of a central shaft, a gear, a pulley, a belt, and a vertical component. The gear is mounted on the left end of the shaft, and the pulley is mounted on the right end. The belt is wrapped around the pulley, and the vertical component is attached to the shaft.
