

Figure 1: A diagram of a vertical pole with a crossbar at the top. A point 'A' is marked on the crossbar. A vertical line segment extends downwards from the center of the crossbar, ending in a small hook-like shape.

The diagram shows a vertical pole with a crossbar at the top. A point 'A' is marked on the crossbar. A vertical line segment extends downwards from the center of the crossbar, ending in a small hook-like shape. This diagram is used to illustrate the concept of a vertical line segment.

The diagram shows a rectangular frame with a vertical line segment extending downwards from its center. The frame has four corners marked with dots. The vertical line segment ends in a hook-like shape, similar to the one in Figure 1. This diagram is used to illustrate the concept of a vertical line segment.

The diagram shows a vertical pole with a crossbar at the top. A point 'A' is marked on the crossbar. A vertical line segment extends downwards from the center of the crossbar, ending in a small hook-like shape. This diagram is used to illustrate the concept of a vertical line segment.
