

ANATOMY

System	Organ	Function
Respiratory	Trachea	Conducts air in and out of the lungs
	Bronchi	Branches of the trachea that lead to the lungs
	Lungs	Organs where gas exchange occurs
	Alveoli	Small air sacs where oxygen and carbon dioxide are exchanged
Circulatory	Heart	Pumps blood throughout the body
	Arteries	Carry oxygenated blood away from the heart
	Venae cavae	Carry deoxygenated blood to the heart
	Capillaries	Small blood vessels where exchange of substances occurs
Digestive	Mouth	Where food is taken in and broken down
	Esophagus	Tube that carries food from the mouth to the stomach
	Stomach	Where food is broken down into smaller pieces
	Small intestine	Where nutrients are absorbed into the bloodstream
