Wear them, share them and trade them with your friends! Match your mood or match your outfit. You'll love all the fun emoji beads. With so many, your friends will sharing them with you. 

# eMOJI window art

Ages 6-96  
#6176000

Create beautiful window art with this sparkling stained glass paint. Trace your favorite emoji designs with the black outline paint and then fill them in with an array of brilliant colors. Make your designs pop with 3-D googly eyes in a variety of sizes.

Sparkling window paint can also be used to decorate mirrors or any smooth glass surface.

Remember - Sparkling window paint or outline should never be used on painted walls, fabric, wood or other porous surfaces. If you are not sure, check with an adult before displaying your art.

### Important Information About This Paint

- The paint included is a specially formulated non-toxic acrylic paint that dries permanently on most surfaces, so be careful.
- Paint may stain fabrics, furniture and other porous surfaces. Wear a smock or old clothes and cover your work area with newspaper.
- Clean up any spills immediately with soap and water.
- Paints may settle and separate over time. With the cap on, shake well before using.
- Do not shake black outline paint.
- Save any leftover paint to touch up your designs.
- Window cleaner can be used to remove any paint residue from windows and mirrors.

### Paint Tube Tips

Before you paint, here are some important things to remember:

1. These paints begin as opaque, pastel colored liquids. As they dry the colors become translucent and vibrant.
2. If the nozzle becomes clogged, use the tip of a paper clip to clean it out.

### Helpful Hint

To keep your paints from drying out, always replace the caps when not in use.

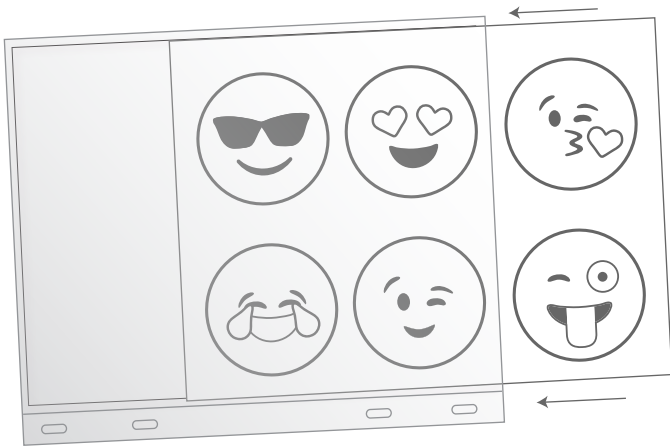

Outline Your Emoji

When outlining and painting your design, be sure all lines are connected and spaces are filled in so when you are finished, you will peel your picture off the plastic sheet as one piece.

You can use the emojis we have included in the kit – or draw your own!

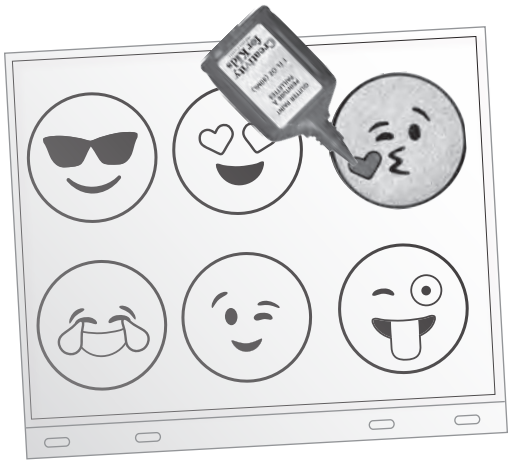

- 1. Choose your emoji design and slide the sheet into the plastic cover as shown.
- 2. Use the black outline paint to trace your designs. Be sure to create a continuous unbroken line.
- 3. Set your design aside to dry. The liner must be completely dry before painting or the paint will smear.

Paint and Decorate

Now it's time to fill in your design. For best results apply a thin even layer of paint. If the paint is too thick it will take a long time to dry and it will be difficult to remove from the plastic sheet.

- 1. Fill in your design with the window colors of your choice. Hold the applicator slightly above the plastic sheet and gently squeeze to release the paint.
- 2. Use the applicator tip to spread the paint around. Be sure the paint covers all open areas.
- 3. When you are finished painting, set it aside to dry. Depending on the thickness of the paint, heat and humidity, drying times may vary. For best results, allow your designs to dry overnight.

Googly Eyes

Once your emojis are completely dry, you can add the googly eyes.

Use a dot of leftover window paint to stick them in place. Allow the paint to dry completely before displaying your designs.

Peel and Press

- Gently peel your finished design away from the plastic sheet. If it sticks, or is difficult to remove, it needs more drying time.
- Press your designs against a clean window. They cling like magic! You can display these on mirrors too.

The color and consistency of your window art may change over time, depending on the amount of light and temperature. Save any leftover paint to create new art.

Blending Techniques

The color blending technique is a great way to add interest and texture to your designs. Simply lay down the colors as shown below. Use a toothpick or paper clip to mix colors together.

**Cheeks**

Add drops of paint where the cheeks are lightly outlined.

Fill in the rest of the emoji with another color.

**Highlights**

Add drops or lines of white paint where highlights are lightly outlined.

Fill in the rest of the emoji with another color.

**Ombre effect**

Fill in the top of the emoji with one color and the bottom with another.

Drag a toothpick or paper clip through where the two colors meet in a zigzag pattern to create a swirly ombre effect.
