		Liposuction	Laparoscopic procedure: Can be up to 12 incisions, 1/4"-1/2" (1/2-1 cm)	2" × 2¾"	3562	3582
				2¾" x 4"	3564	3584

Suggested Island Dressings for Surgical Procedures

3M[™] Tegaderm[™] and 3M[™] Medipore[™] +Pad dressings are all-in-one sterile dressings designed:

- for ease of use
- to reduce application time
- to conform to body contours, providing comfort
- with breathable film to allow skin to function normally with good exchange of moisture vapor and oxygen
- to conform to body contours, and to flex with movement or swelling

Both feature non-adherent, absorbent pads:

- to promote normal healing
- with less pain and trauma
- for light to moderately draining wounds
- won't stick to the wound

3M[™] Tegaderm[™] +Pad Film Dressing with Non-Adherent Pad

Film Barrier – provides both a viral** and a bacterial barrier. Requires fewer dressing changes, while helping to reduce the risk of surgical site infections

Transparent Border – allows monitoring of peri-wound skin without removing dressing

Absorbent, Non-Adherent Pad – for light to moderately draining wounds; won't stick to the wound, allowing normal wound healing process

Waterproof – patient may sponge bathe or shower without removing dressing

Versatile – available in 9 different sizes

3M[™] Medipore[™] +Pad Soft Cloth Adhesive Wound Dressing

Gentle to skin – provides excellent adhesion, yet is gentle to the skin

All-in-one design – reduces application time

Absorbent, Non-Adherent Pad – for light to moderately draining wounds; won't stick to the wound, allowing normal wound healing process

Breathable – better exchange of moisture vapor and oxygen, and reduced risk of skin maceration

Versatile – available in 8 different sizes

1-800-228-3957

^{*}Choose a dressing size large enough to provide a margin that adheres to dry healthy skin around the incision site.

^{**}In vitro testing shows that the transparent film dressing provides a viral barrier from viruses 27 nm in diameter or larger while the dressing remains intact without leakage.
