

ENHANCE SONOS CONTROL WITH INSTANT-ACCESS BUTTONS

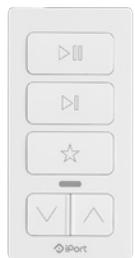

xPRESS, the Audio Keypad for Sonos, allows you to control your Sonos device anywhere, anytime. Play music, adjust volume, skip tracks, and assign favorites with the press of a button. You can also assign selected favorites to the Keypad to curate music for different parts of the house. And with custom scenes, you can group specific Sonos devices, setting the volume and playing the desired favorite from your Keypad.

The xPRESS Audio Keypad works on 2.4GHz WiFi and includes a rechargeable battery for 4 to 6 months of use before needing to be recharged. With options to magnetically mount your Keypad on a metallic surface, wall, or coffee table, xPRESS gives you instant control of your Sonos players throughout your home, allowing you to access music anywhere you want.

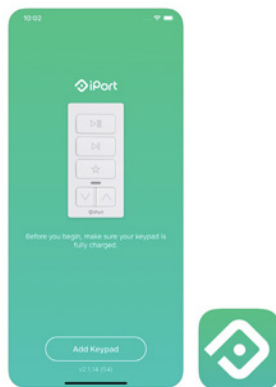

To set up your xPRESS, simply download the IPORT Connect App for iOS from the App Store, add your keypad to your network and add it to a Sonos device, choose a spot to install your keypad, and enjoy!
