

3M™ Versaflo™ TR-6590N Multi-Gas Cartridge

Protection against a wide range of gases and vapors.

The first-ever NIOSH-approved, multi-gas PAPR cartridge approved for use against mercury!

The 3M™ Versaflo™ TR-6590N Multi-Gas Cartridge offers protection against a wide range of gases and particulates, and is NIOSH-approved for use with 3M™ Versaflo™ TR-600 Series Powered Air Purifying Respirators (PAPRs).

Key Features and Benefits

Broad protection – Cartridge can be used against a wide spectrum of gases, vapors and particulates and is the first multigas PAPR cartridge with National Institute for Occupational Safety and Health (NIOSH) approval for use against mercury.

Easy and versatile – This cartridge can be used with loose-fitting hoods and head tops, which do not require fit testing like full-face tight-fitting reusable respirators do.

Comfortable – Designed to help workers stay more comfortable all shift long. The Versaflo family uses a blower for easier breathing and, unlike some respirator systems, includes headtops that accommodate limited facial hair without compromising protection.

Approved for use against:

- Mercury
- Particulates
- Chlorine dioxide
- Chlorine
- Hydrogen chloride
- Hydrogen fluoride
- Sulfur dioxide
- Ammonia
- Methylamine
- Certain organic vapors

3M PSD products are for occupational use only.

	<p>WARNING</p> <p>These respirators help reduce exposures to certain airborne particulates. Before use, the wearer must read and understand the User Instructions provided as a part of the product packaging. A written respiratory protection program must be implemented meeting all the requirements of OSHA 1910.134 including training, fit testing and medical evaluation. In Canada, CSA standards Z94.4 requirements must be met and/or requirements of the applicable jurisdiction, as appropriate. Misuse may result in injury, illness or death. For correct use, consult supervisor and User Instruction, or call 3M PSD Technical Service in USA at 1-800-243-4630 and in Canada at 1-800-267-4414.</p>
