INSTALLATION INSTRUCTIONS

Please read carefully and save these instructions as you may need them a later date.

CAUTION

WARNING: Risk of Fire. Consult a qualified electrician to ensure correct branch circuit conductor.

Turn off the main power at the circuit breaker before installing the fixture in order to prevent possible shock.

GENERAL

All electrical connections must be in accordance with local and National Electrical Code (N.E.C.) standards. If you are unfamiliar with proper electrical wiring connections obtain the services of a qualified electrician.

Remove the fixture and the mounting package from the box and make sure that no parts are missing by referencing the illustration.

ASSEMBLY AND INSTALLATION

1. Carefully unpack the fixture, lay out all parts on a clean surface.
2. Assemble the arm (1) to the back plate using the fixture loop (2), plastic washers (3), screw (4), and lock nuts (19).
3. Secure the mounting strip (6) to the outlet box (8) using the outlet box screws (9).
4. Connect all electrical wires using wire connectors (13): white fixture wire (17) to white supply wire (16), black fixture wire (15) to black supply wire (14), and fixture ground wire (12) to supply ground wire (10) using the ground screw (11), then carefully tuck all wires into the outlet box.
5. Position the back plate (5) against the wall and secure it using the mounting screws (7).
6. Install the appropriate bulb (20, not included) into the socket.
7. Turn on the power and test the light fixture.

INSTALLATION IS NOW COMPLETED
