

LEATHER M-PACT® FRAMER

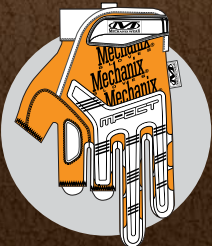

D30®
.....

LEATHER HAND PROTECTION

Measure twice, cut once. The M-Pact® Leather Framers work glove is designed to provide professional carpenters with a functional fingerless design that delivers more dexterity when measuring, cutting and framing structures. The Framers' fingerless design frees your thumb, index and middle fingers so you can handle your arsenal of tools with precision and control. D30® palm padding reacts on impact to absorb and dissipate energy when you're in full swing on the job. The glove is constructed with DuraHide™ leather and flexible Thermoplastic Rubber (TPR) to protect the back of your hands from impact injuries or the occasional hammer strike.

FINGERLESS DESIGN

Fingerless design delivers more dexterity when measuring, cutting and framing.

LEATHER

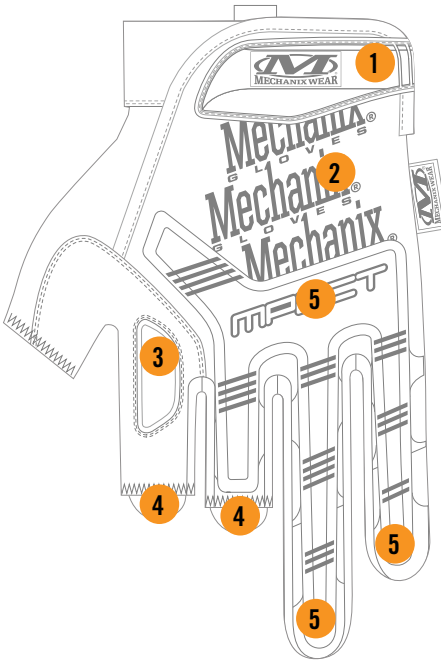

DuraHide™ leather protects your palm with extreme abrasion resistance.
