

## The People on the Bus

A bus started out with no one in it except the driver.

Three people got on at the first stop. Nobody got off.

Five people got on at the second stop. Two people got off.

Four people got on at the third stop. Six people got off.

Three people got on at the fourth stop. Four people got off.

How many people (other than the driver) were on the bus after the bus finished each stop?
