

The cell wall is a rigid structure that provides support and protection. The cell membrane is a thin layer that controls the movement of substances in and out of the cell. The nucleus contains the cell's genetic material. The vacuole stores water and other substances. Chloroplasts are responsible for photosynthesis. Mitochondria are the powerhouses of the cell, producing energy.

FALCETILE

The falsette is a stringed instrument that is used to play music. It is similar to a guitar but has a different body shape and sound hole. The neck is made of wood and is attached to the body. The headstock has tuning pegs that are used to adjust the tension of the strings.
