## PRODUCT SUMMARY

The 7-Day ReduceXS Total Body Cleansing Program is designed to restore intestinal integrity and reduce gut permeability, support and enhance hepatic detoxification pathways, and improve bowel transit time and the elimination of toxins.

The 7-Day ReduceXS kit has the following components:

The **RestorX® Intestinal Repair Nutritional Drink Mix** contains a variety of supportive nutrients, such as L-glutamine, N-acetyl glucosamine, quercetin, and probiotics, which have been clinically shown to restore intercellular junction integrity, reduce intestinal permeability, prevent damage to intestinal cells, and optimize the function of the gut barrier.

The **DetoxiCleanse® Detoxification Nutritional Drink Mix** contains a variety of supportive nutrients, including N-acetyl-L-cysteine, alpha-lipoic acid, green tea extract, milk thistle, and broccoli powder, which work to support detoxification pathways, eliminate toxins from the body and protect cells from oxidative stress.

Both of these gluten-free formulas contain powerful antioxidants, reducing the effects of oxidative damage. The colon and liver support packets included in the program help ensure optimal detoxification as well as the elimination of toxins from the body.

**Colon Support** is a gentle laxative that helps maintain bowel movement regularity.

**BioLivX®** contains important phytochemicals that support normal liver function and supplies substances used by the liver to help detoxify the body's natural toxins.
