

The point is  $(x, y, z)$ .  
 The vertical line segment is  $z$ .  
 The horizontal line segment is  $\sqrt{x^2 + y^2}$ .  
 The length of the diagonal is  $\sqrt{x^2 + y^2 + z^2}$ .

## QUESTION

The point is  $(x, y, z)$ .  
 The vertical line segment is  $z$ .  
 The horizontal line segment is  $\sqrt{x^2 + y^2}$ .  
 The length of the diagonal is  $\sqrt{x^2 + y^2 + z^2}$ .
