

Easy to Install

The patented universal system is designed to attach to the three main types of jacks found on RVs: scissor, front landing gear and telescoping. JT's Strong Arm Jack Stabilizers come in easy bolt-on kits of four or six stabilizer tubes and everything needed for installation.

Rock-Solid Stability

Each JT's Strong Arm stabilizer tube bolts on to each landing gear leg and to the RV frame, forming a rigid triangle to eliminate unwanted chassis movement and provide a rock-solid camping experience.

Eliminate rocking and swaying at the campsite!

Quick Facts

- Eliminates annoying chassis movement
- Provides a rock-solid camping experience
- Dealer installation or do-it-yourself
- One-time installation/permanently attached
- Works with all type of jacks
- Bolt-on installation; no welding required
- If unit has hydraulic jacks, three #314592 jack adaptor lugs are required
