Step 1

Let's get started! Insert Wooden dowels (A) into the corresponding spots in the Left Cabinet Panel (4). Then, using a Phillips head screwdriver, screw the Cabinet member side of the (S) Drawer Glides into the Left Cabinet Panel (4) using the (L) Screws. On the Drawer Glide (S) in the middle of the Left Cabinet Panel (4), insert Cam bolts (B).

Tip

1: The provided glue is to secure wood dowels in place. When first inserting dowels, locate the appropriate hole for the dowel, place a small amount of glue in the hole and insert the dowel. Wipe away excess glue immediately.

2: In future assembly steps when dowels are necessary to attach assembly parts together, place a small amount of glue on the end of the dowel before attaching parts together. Wipe away excess glue immediately.

Step 2

Now, follow that same process for the Cabinet Divider Boards (8)! Insert Wooden dowels (A) into the corresponding spots in the Cabinet Divider Boards (8). Screw the Cabinet member side of the (T) Drawer Glide into each Cabinet Divider Board (8) using the (L) Screws.

Step 3

Insert Wooden dowels (A) into both the Right Cabinet Panel (5) and the Shelf (6). Then, screw Cam bolts (B) into both pieces.

Step 4

Making sure the finished edge of the Cabinet Divider Board (8) is facing out, secure the Cabinet Divider Board (8) to the Shelf (6) using the (E) Bolts. Tighten with the Hex key.

Step 5

While still ensuring that the finished edge of the Cabinet Divider Board (8) is facing out, secure the Cabinet Divider Board (8) to the other side of the Shelf (6) using the (C) Cam locks. Tighten with a screwdriver!

Cam Locks

Cam Locks help securely join two pieces together. Follow these easy steps.

1: Insert Cam Bolt into bolt holes on the flat side. Don't over tighten!

2: Fit the proper holes on the edge of the other part over the Cam Bolts. You should be able to see the cam bolts through the larger hole on the side.

3: On the back of the Cam Lock will be a "C" shape. Insert the Cam Lock so the opening of the "C" fits over the Cam Bolt. Tighten with the screwdriver.

Step 6

Secure the right side of the Shelf (6) to the Right Cabinet Panel (5) using the (C) Cam locks. Tighten with a screwdriver.

Step 7

Now, repeat that for the other side! Secure the left side of the Shelf (6) to the Left Cabinet Panel (4) using the (C) Cam locks. Tighten with a screwdriver.
