TROUBLE SHOOTING

Before requesting services for this DVD player, please check the items below for a possible cause of the problem you are encountering. Some simple checks or a minor adjustment on your part may eliminate the problem and restore the proper operation.

PROBLEM	ACTION
POWER	
The power supply is disconnected.	➤ Please check if the AC power cord has been connected correctly.
PICTURE	
No picture	<ul style="list-style-type: none"> ➤ Replace the breakage video cable before you turn on the player. ➤ Re-check if the connector of player has been properly connected to TV set. ➤ Connect the video cable securely into the appropriate jacks and ensure that the equipment is connected firmly. ➤ Ensure that the power of TV set is turned on. ➤ Make sure if the appropriate video input mode is selected on the TV, so that the video image can be displayed on the screen properly.
Picture distortion	<ul style="list-style-type: none"> ➤ The disc is dusty and needs to be cleaned. ➤ It is normal for some distortion to occur when the Progressive Scan Mode of DISPLAY Setup is selected, even if the TV set is compatible with the progressive scan mode (525p). Therefore, please change the Scan Mode to Interlaced Scan.
Picture not suit TV screen	➤ The troubled images may not be able to fill up the whole TV screen even after the Picture Mode of the Audio Menu is set. This is because the DVD images are fixed in width.

USB/SD OPERATION

When insert the USB/SD Storage Device into the USB/SD slot, the player will auto search the directories saved MP3 / JPEG files. Also we can use mode button on remote controller to switch state between usb and disc.

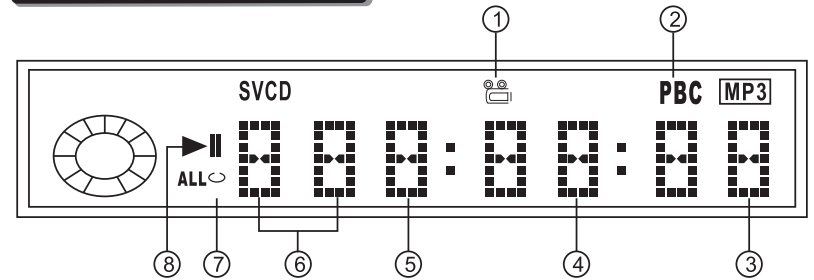

Note: The USB / SD port function just be valid for flash memory USB/SD device (Support format: MP3, WMA, MPEG -4)

Noted: When power on, the default is AUX mode if without DISC/USB/SD, and the default is DVD if DISC inside.

【Set password】

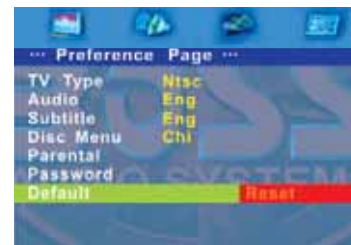

The password option is initialized locked, and you cannot set the ratings limit or change the password. In order for the ratings feature work, the password mode must be turned on. If you want to set the ratings limit, you will need to enter the default password, which is 1369, then press enter to confirm. To change the password, you will be prompted for the old password, then be prompted for a new. Enter a 4-digit number (this is your password).

Notes: Some time, the password is 4 - digit number, the default is 1369.

The rating feature is a rating limit system, like movie ratings. It works with DVD discs that have been assigned a rating. This helps you control the types of DVDs that your family watches.

There are two rating options: NO ADULT and KID SAFE. Select the VIEW ALL option to cancel the rating limit. The default setting is VIEW ALL.

【Use Default settings】

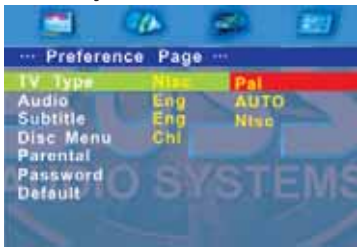

Choose this option to resume all the setup options to default settings.

16 : 9 (Wide Screen): Choose this setting if your DVD player is connected to a wide screen TV. You'll see the movies in their original aspect ratio (height- to-width ratio). If you choose this setting and you don't have a wide screen TV, the images on the screen may appear distorted due to vertical compression.

4 : 3 LB (Letter Box): Choosing this setting if your DVD player is connected to a normal ratio TV. You'll see the entire frame of the movie, but it will take up a smaller portion of the screen vertically. The movie might appear with black bars at the top and bottom of the screen.

【TV System】

According to the Color System of the TV, you can choose the TV System.

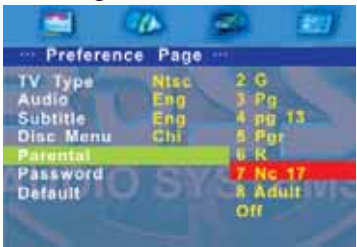

AUTO : Choose this settings if your DVD player is connected to a multi-system TV.

NTSC : Choose this settings if your DVD player is connected to a NTSC TV.

PAL : Choose this settings if your DVD player is connected to a PAL TV.

The default setting is NTSC.

【Rating set】

Press **↑/↓/←/→** direction button to select a item, then press **ENTER**.
