

PROBLEM 1

1. A particle of mass m is moving in a circular path of radius r with a constant speed v . Find the change in its momentum when it moves through an angle θ .

2. A particle of mass m is moving in a circular path of radius r with a constant speed v . Find the change in its momentum when it moves through an angle θ .

3. A particle of mass m is moving in a circular path of radius r with a constant speed v . Find the change in its momentum when it moves through an angle θ .
