

1. **Identify the components of the cell.**
2. **Label the organelles.**
3. **Describe the function of each organelle.**

4. **Explain the structure and function of the nucleus.**
5. **Describe the role of the central vacuole.**
6. **Discuss the importance of chloroplasts.**

7. **Identify the organelles involved in protein synthesis.**

8. **Explain the structure and function of the cell membrane.**
9. **Describe the role of the cytoplasm.**
10. **Discuss the importance of the Golgi apparatus.**
