

LYSOL® Laundry Disinfectant

Crisp Linen

Our clothes are in constant contact with bacteria throughout our day-to-day activities, for example through contact with contaminated surfaces, other people and our own bodies. Bacteria can spread from one fabric to another in the laundry basket, from the washing-machine drum to the next load. Some of these bacteria can survive following the wash cycle. When it comes to certain laundry loads such as children's clothes or sportswear, you want to eliminate bacteria that may cause illnesses and create lingering bad smells. But detergents alone don't actually eliminate all bacteria.

Features & Benefits

- Simply add to rinse cycle
- Contains 0% bleach
- Works even in cold water
- Gentle on most fabrics including whites & colors
- Works in all standard & HE machines; Suitable for children's clothes, gym clothes, underwear, towels, bedding & delicates

* When used as directed.

LYSOL® Laundry Disinfectant

Crisp Linen

Use instructions

Step 1: For standard machines: Fill 2 capfuls to line 1 of the dosing cup. For HE machines: Fill 2 capfuls to line 2 of the dosing cup.

Step 2: Add two capfuls to the fabric softener compartment at the start of laundry cycle. If machine does not have a fabric softener dispenser, wait until rinse cycle and add directly to drum of machine.

Step 3: Leave in rinse cycle for 16 minutes. Clothes come out sanitized killing 99.9%* of bacteria. *Use as directed

*Kills SARS-COV-2 in 5 minutes in pre-soak
