

## RESEARCH IDEAS TO

EXPLORE WITH STUDENTS AND DISCUSS WITH THEM

1. How do you think the different parts of the cell are related to the cell's function?

2. How do you think the different parts of the cell are related to the cell's structure?

3. How do you think the different parts of the cell are related to the cell's environment?

4. How do you think the different parts of the cell are related to the cell's growth?

5. How do you think the different parts of the cell are related to the cell's reproduction?

6. How do you think the different parts of the cell are related to the cell's death?

7. How do you think the different parts of the cell are related to the cell's survival?

8. How do you think the different parts of the cell are related to the cell's health?

9. How do you think the different parts of the cell are related to the cell's energy?

10. How do you think the different parts of the cell are related to the cell's information?

11. How do you think the different parts of the cell are related to the cell's communication?

12. How do you think the different parts of the cell are related to the cell's movement?

13. How do you think the different parts of the cell are related to the cell's response?

14. How do you think the different parts of the cell are related to the cell's adaptation?

15. How do you think the different parts of the cell are related to the cell's evolution?

16. How do you think the different parts of the cell are related to the cell's development?

17. How do you think the different parts of the cell are related to the cell's differentiation?

18. How do you think the different parts of the cell are related to the cell's maturation?

19. How do you think the different parts of the cell are related to the cell's aging?

20. How do you think the different parts of the cell are related to the cell's death?
