

The graph shows the relationship between the number of people and the number of people per room. The x-axis represents the number of people, and the y-axis represents the number of people per room. The curve starts at a high point on the y-axis and decreases as the number of people increases, eventually leveling off.

QUESTION

The graph shows the relationship between the number of people and the number of people per room. The x-axis represents the number of people, and the y-axis represents the number of people per room. The curve starts at a high point on the y-axis and decreases as the number of people increases, eventually leveling off.

The graph shows the relationship between the number of people and the number of people per room. The x-axis represents the number of people, and the y-axis represents the number of people per room. The curve starts at a high point on the y-axis and decreases as the number of people increases, eventually leveling off.
