

# SENSORFLO<sup>®</sup> FAUCET & SOAP SYSTEM

**SPEAKMAN<sup>®</sup>**

# SPEAKMAN SENSORFLO® TOUCHLESS FAUCET & SOAP SYSTEM

Speakman Sensorflo maximizes hygiene at the sink. Combining the convenience of soap and water into an all-in-one solution. No more mounting a separate soap dispenser and faucet. This combination unit offers a durable fixture with our customers needs in mind.

Featuring a solid, lead-free brass construction, it is not only sturdy but conforms to drinking standards. The sensors incorporate advanced laser technology, emitting a non-visible beam of light for instant on and off operation. Speakman Sensor Faucet and Soap System is ideal high-traffic restrooms and environments where durability and performance matter most.

SFC-9790

SFC-8790
