1 Stake Front Corners

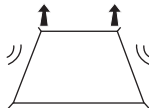

Secure the front corner anchors by pounding the stakes into the ground with a rock or hard object. Make sure the removable cord is fully tensioned to ensure proper placement.

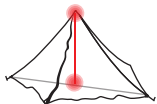

2 Stake Rear Corners

Pull the rear anchors taut and tension them straight back from the front corners of the tent to create a symmetric trapezoidal area. Stake the rear anchors in place.

3 Insert and Extend Tarp Pole

Insert and extend the tarp pole upwards, with the smooth metal end sitting in the reinforced pocket.

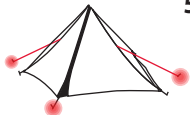

4 Stake Vestibule

Stake vestibule and pull firmly on all adjustable anchors to ensure proper tension.

5 Stake Guy-outs (optional)

Tie additional guylines to the tent's reflective webbing loops and stake to ground to maximize strength, tension, and wind resistance.
