

THE BATTERY

1. The battery is the source of electrical energy for the vehicle.

2. The battery is located in the engine compartment.

3. The battery is connected to the vehicle's electrical system.

4. The battery is used to start the engine.

5. The battery is used to power the vehicle's electrical system.

6. The battery is used to power the vehicle's accessories.

7. The battery is used to power the vehicle's lights.

8. The battery is used to power the vehicle's horn.

9. The battery is used to power the vehicle's radio.

10. The battery is used to power the vehicle's power windows.

11. The battery is used to power the vehicle's power locks.

12. The battery is used to power the vehicle's power mirrors.

13. The battery is used to power the vehicle's power seats.

14. The battery is used to power the vehicle's power steering.

15. The battery is used to power the vehicle's power windows.

16. The battery is used to power the vehicle's power locks.

17. The battery is used to power the vehicle's power mirrors.

18. The battery is used to power the vehicle's power seats.

19. The battery is used to power the vehicle's power steering.

20. The battery is used to power the vehicle's power windows.

21. The battery is used to power the vehicle's power locks.

22. The battery is used to power the vehicle's power mirrors.

23. The battery is used to power the vehicle's power seats.

24. The battery is used to power the vehicle's power steering.

25. The battery is used to power the vehicle's power windows.

26. The battery is used to power the vehicle's power locks.

27. The battery is used to power the vehicle's power mirrors.

28. The battery is used to power the vehicle's power seats.

29. The battery is used to power the vehicle's power steering.

30. The battery is used to power the vehicle's power windows.

IGNITION

Part	Description
Battery	12V, 45Ah
Fuse	15A
Ignition Switch	12V
Coil	12V
Distributor	12V
Spark Plug	12V

The ignition system is used to start the engine. It consists of a battery, a fuse, an ignition switch, a coil, a distributor, and a spark plug.

The battery is used to power the ignition system.

The fuse is used to protect the ignition system from electrical shorts.

The ignition switch is used to start the engine.
