MEDICAL WASTE

Biohazard Bags

Dynarex Biohazard Bags provide a reliable solution for the safe containment of infectious waste, helping to reduce the risk of spreading harmful pathogens. Constructed from durable, impact-resistant plastic materials, these bags are available in various sizes to meet diverse facility needs. The bright red color, accompanied by a clearly visible biohazard symbol and warning messages in both English and Spanish, facilitates proper handling and disposal of hazardous materials. Ideal for use in hospitals, clinics, and laboratories, Dynarex Biohazard Bags offer a practical option for managing medical waste while promoting safety and compliance with regulatory standards.

- Biohazard bags designed to provide safe containment and isolation of infectious waste
- Designed to reduce the risk of cross-contamination in medical and healthcare settings
- Bright red color and clearly visible biohazard symbol help ensure proper handling
- Bilingual warning messages in English and Spanish for proper identification
- Made with durable, impact-resistant plastic materials for reliable strength
- Available in multiple sizes to accommodate varying amounts of waste
