- Enhanced injection head design pushes the repair resin deeply into cracks, displacing air bubbles, to restore the look of the glass
- Design works best on bullseye, half-moon, and star-shaped damage, up to 1 in. in diameter and cracks up to 12 in. (30 cm) long
- Safe to use on all types of laminated windshields to minimize the appearance of damage and stop the spread of chips and cracks
- Advanced resin repair fluid requires no mixing, fully cures in natural sunlight, and provides a professional quality repair

- For best results, repairs should be made as soon as possible after the damage occurs, before dirt or water contamination
- Complete repairs in a shaded area with the windshield temperatures between 60°F and 90°F (15°C to 32°C)
- Included: Suction cup bracket, Repair resin 2.5 ml (2), Curing strips (5), Razor blade, Pushpin, and instructions
