

QUESTION 134792

Identify the most likely cause of the following patient's symptoms.

The diagram shows a simplified view of the human respiratory system. The trachea is at the top, branching into the left and right bronchi. The lungs are shown as two large, rounded structures. A red arrow points to the right lung, indicating a lesion. The patient's symptoms are listed below the diagram:

- Cough
- Hemoptysis
- Weight loss
- Night sweats
- Fatigue
- Fever
- Chest pain
- Shortness of breath
- Anorexia
- Night sweats
- Hemoptysis
- Weight loss
- Fatigue
- Fever
- Chest pain
- Shortness of breath
