# DECORATE & DISPLAY:

Once the glue is dry, you're ready to add the stickers. Simply peel and stick them wherever you'd like. Have fun creating your little land.

Place the unicorn figurine inside your Rainbow Sandland!

Fun tip: If you have other mini figurines in your toy collection, add them to this colorful world so they can play with your mini unicorn.

To keep your Sandland looking great, display it on a flat surface. Tipping or shaking may cause the layers to shift.

CREATIVITY counts®

Creativity Can™ develop the skills needed to achieve lifelong success.

Creativity develops children's problem solving and critical thinking skills – it's the catalyst for invention, innovation and ideas that influence the future.

RAINBOW SANDLAND

Create a magical world with colorful sand, playful stickers and an adorable mini unicorn!

Important Information - Prep Your Workspace

- Cover your work surface with something to catch any spilled sand like a large box lid, tray or cookie sheet.
- Ask an adult if you need help opening the bags of sand & glitter.

BEFORE YOUR BEGIN:

You may want to place your container in the Foam Base, so you can see how it looks with your sand colors.

IMPORTANT NOTE: Stop layering when the sand reaches about **3** inches full. Measure from the bottom of the layered sand as shown. Use the printed ruler.

START LAYERING:

Choose a sand color for the bottom layer, or start with the silver glitter. Carefully snip off a **very small** corner of the bag with scissors.

Use the funnel to guide the sand and glitter while pouring it into the container. Don't pour all of it if you want to use it again to create another layer.
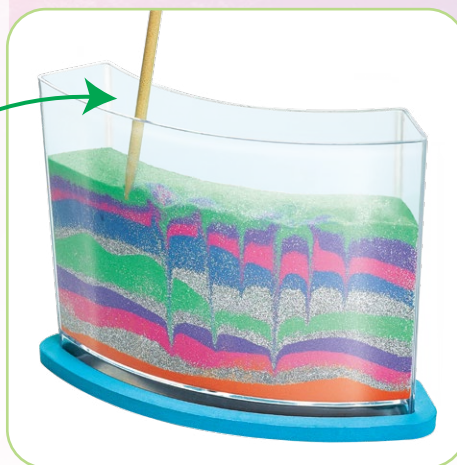

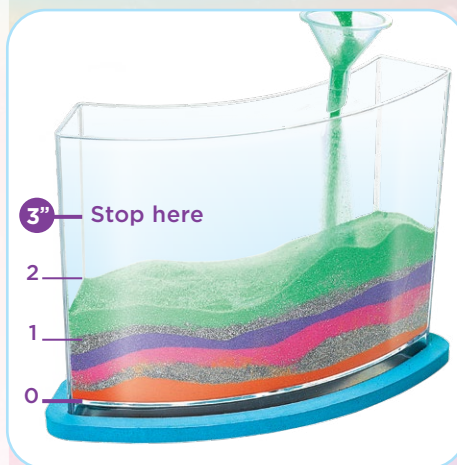

Pro Tip: If glitter or sand sticks to the sides of the container as you pour, use your fingers to wipe it off for a cleaner look.

Add more or less sand/glitter to create the look you want.

DESIGN TOOL:

Create cool effects with the wooden Design Tool. Insert the pointed end into the sand layers along the container wall. Slowly pull up and watch your sand layers take shape.

Use the Design Tool as you go, or after your layers are complete.

SEAL WITH FOAM:

When finished, insert the Foam Top to keep the sand from spilling. Push down firmly along the entire piece. It should be snug.

Add a line of glue around the edge of the Foam Top and the container wall.

Add a line of glue along the inside edge of the Foam Base and the container wall.

Let it dry completely.
