

This diagram illustrates the structure of a network or system. The central point represents the core or hub, and the radiating lines represent the connections or components. The overall shape is roughly square, with the lines extending towards the corners and midpoints of the sides.

## FACTFILE

This section provides a factfile of the diagrams. It includes a title 'FACTFILE' and two diagrams. The first diagram is a square with internal lines forming a grid. The second diagram is a square with internal lines forming a different geometric pattern.

This diagram illustrates the structure of a network or system.
