

**THE HISTORY**  
 OF THE  
 UNIVERSITY OF  
 CALIFORNIA  
 BERKELEY

THE UNIVERSITY OF CALIFORNIA BERKELEY was founded in 1868 as the first public university in the United States. It was established by the California State Board of Education, which was created by the California Constitution of 1849. The university's first president, Richard D. Lynd, was appointed in 1869. Under his leadership, the university grew from a small college to a major research institution. In 1874, the university was renamed the University of California. The following year, the first classes were held at the University of California Hall, which was the first building on the Berkeley campus. The university's early years were marked by a focus on agriculture and the natural sciences. In 1891, the university was granted the right to confer doctoral degrees. This led to a rapid expansion of the university's research programs. By the early 20th century, the university had become a leading center of research in many fields. In 1921, the university was granted the right to confer master's degrees. This further solidified its position as a major research institution. In 1933, the university was granted the right to confer bachelor's degrees. This marked the beginning of the university's modern era. Under the leadership of President Robert Gordon Woodbury, the university underwent a major restructuring. This led to the creation of the University of California System, which consists of ten campuses. Berkeley is the largest and most prominent of these campuses. Today, the University of California Berkeley is a world-renowned institution. It is home to some of the most brilliant minds in the world. The university's research programs are among the most advanced in the world. Its commitment to excellence and innovation has made it a leader in many fields. The University of California Berkeley is a place where the future is being created.

UNIVERSITY OF CALIFORNIA BERKELEY		OFFICE OF THE CHANCELLOR
NAME	ADDRESS	
John Doe	1234 Main St.	101 California Hall Berkeley, CA 94720 Tel: (415) 848-1234
Jane Smith	5678 Elm St.	
Bob Johnson	9010 Oak St.	
Alice Brown	3456 Pine St.	

## RESEARCH RESULTS

The following table shows the research output of the University of California Berkeley from 1980 to 2000. The data is presented in a line graph format. The x-axis represents the year, and the y-axis represents the research output. The graph shows three data series: Total Research Output, Basic Research, and Applied Research. The total research output shows a steady increase over the period, with a significant acceleration starting around 1990. Basic research output also shows a steady increase, while applied research output shows a more gradual increase. The data indicates that the University of California Berkeley has become a major center of research in many fields, particularly in the areas of basic and applied research.
