

The diagram shows a plant cell with several labeled parts. The cell wall is the outermost layer, followed by the cell membrane. Inside, the large central vacuole is a prominent feature. Other visible structures include the nucleus, cytoplasm, and various organelles. The labels likely identify these components, such as the cell wall, cell membrane, nucleus, and vacuole.

Diagram of a plant cell showing various organelles and their relative positions within the cell structure.

FACTFILE

Diagram of a leaf cross-section showing the internal structure, including the epidermis, mesophyll, and stomata.
