

# LIFEPAK® CR2 Trainer (USB)

## For the LIFEPAK CR2 Defibrillator

## Training improves readiness.

The LIFEPAK CR2 Trainer provides realistic training in the use of the LIFEPAK CR2 Defibrillator without the actual charge and discharge of electrical energy. Designed to simulate the appearance of the CR2, the Trainer simulates its actual operation using the same simple user interface. Pre-set demos can be programmed for fully automatic or semi-automatic mode to enable a quick demonstration of the key CR2 features.

### Device realism

The Trainer guides users through simulated analysis, energy delivery and CPR intervals with CPR coaching.

### Programmable scenarios

All of the functions of the Trainer are programmable to simulate the full range of scenarios users might encounter during “real life” use of the LIFEPAK CR2 Defibrillator. The Trainer provides two fully configurable scenarios that can be customized using a setup screen and can be updated on the go for maximum flexibility.

### Simple and affordable

The Trainer detects when pressure is placed on the QUIK-STEP™ training electrodes and automatically advances through the scenario, eliminating the need for a remote control. A pause button on the unit enables stopping an in-progress scenario as needed. Plus, the CR2 Trainer is cost-effective. Not only is it powered by four standard D-cell batteries, but the electrodes are affordable and reusable, simulating the rapid-access QUIK-STEP defibrillation ECG electrodes unique to the LIFEPAK CR2 Defibrillator.

- Dynamic and versatile training tool
- Same intuitive, simple operation as the LIFEPAK CR2 Defibrillator
- Fully customizable scenarios
- No remote to manage
- ClearVoice™ technology

# Specifications

## General

---

For use in temperature-controlled areas protected from precipitation. Capable of withstanding heavy usage and prolonged periods of operation.

## Physical Characteristics

---

**Height:** 27.2 cm (10.7 in), with handle

**Width:** 21.8 cm (8.6 in)

**Depth:** 8.6 cm (3.4 in)

**Weight:** 1.8 kg (3.9 lbs), with batteries

### BATTERIES

6 volts/4 cells, range 3.3–6.6 Vdc. Four nonchargeable D-cell alkaline batteries. New batteries will provide no less than 100 hours of continuous operation at volume 4.

### BUTTONS

Language, Power, Child Mode, Shock

### DISPLAY

**Power Indicator:** Off when device is off; On when device is in use or setup mode; flashes when device is in standby mode (lid is closed)

## Scenario Options

---

**Device Type:** Semi, Fully Auto

**Number of Events:** 1, 2, 3, 4, Repeat

**Shock Advised:** Yes, No

**CPR Metronome:** Hands-only, 30:2

**CPR Time:** Short, 60s, 120s, 180s

**No CPR Detected:** On, Off

**Motion Detected:** On, Off

**Bilingual:** On, Off

**Second Language:** All

**Check Breathing:** On, Off
