PURELL® CXM™, CXI™ and CXT™ REFILL LOADING INSTRUCTIONS

These instructions apply to PURELL brand CXM, CXI and CXT dispensers.

Please read all instructions carefully before loading the refill.

Refill Installation
(refill @sold separately)

1. Insert dispenser straw A.

2. Feed the dispenser straw B on the refill bottle C up through the motor assembly/bottle support D and dispenser assembly, aligning the two indents in the bottle and the support. Slide the refill bottle upward until it snaps into place.

NOTE: The refill is not properly installed until you hear the "snap" (as the green release latch on the motor assembly/bottle support D engages).

Refill Removal

1. Grasp the empty refill bottle C with one hand and use the other hand to push the green release latch on the motor assembly/bottle support D to the right (counterclockwise as seen from above).

2. While still pushing the green release latch, pull downward on the refill bottle C and remove it from the motor assembly/bottle support D.
